I. Introduction Plan Documentation

Promulgation Document

The promulgation document puts the plan “in force”. It announces the plan and makes it official; giving both authority and responsibility to those organizations identified within it to perform their given tasks. It should describe the process and responsibilities for those tasked with identifying, preparing and maintaining standard operating procedures that explain “how” the tasks will be completed. It should also commit those organizations tasked to train and exercise as appropriate to successfully be able to implement the plan.

**Promulgation of the Radford University Emergency Operations Plan**

By virtue of the authority vested in me by the Board of Visitors as President of Radford University and as the administrator ultimately responsible for emergency management on campus, I hereby promulgate and issue the Radford University Emergency Operations Plan (“EOP”) dated September 2008. The Plan provides for the university’s response to emergencies and disasters in order to save lives; to protect public health, safety, and property; to restore essential services; and to enable and assist with economic recovery.

The Plan is consistent with the Code of Virginia Chapter 1 of Title 23 and the National Incident Management System as implemented in the National Response Plan adopted December 2004.

The University Coordinator of Emergency Preparedness, on behalf of the President, is hereby authorized to activate the Emergency Operations Center (“EOC”) in order to direct and control emergency operations that affect Radford University. Augmentation of the EOC shall constitute implementation of the Plan.

Furthermore, the Coordinator of Emergency Preparedness is hereby authorized, in coordination with the President's Office, to amend this plan as necessary to ensure the continued health and safety of the students, faculty, staff and property of Radford University.

In accordance with the duties and responsibilities assigned in the EOP, the head of each designated university department or program shall appoint a lead and at least one alternate Emergency Coordination Officer for the department or program. The Emergency Coordination Officer is assigned the following responsibilities:

1. Coordinate with the Coordinator of Emergency Preparedness on emergency prevention, preparedness, response, and recovery issues;

2. Prepare and maintain designated parts of the Plan for which the department or program is responsible;
3. Prepare and maintain internal plans and procedures to fulfill the responsibilities designated in the Plan;

4. Maintain a roster of department or program faculty and staff to assist in disaster operations and ensure that persons on the roster are accessible and available for training, exercises, and activations of the Plan;

5. Coordinate appropriate training for department of program personnel assigned to disaster operations;

6. Prepare and maintain internal emergency preparedness, response, and recovery plans for the department or program's resources (facilities, personnel, and assets) that outline a comprehensive and effective program to ensure continuity of essential functions under all circumstances;

7. Assure the Coordinator of Emergency Preparedness that preparedness plans for its department facilities are coordinated with the applicable local emergency management agency.

This Promulgation shall be effective upon its signing and shall remain in full force and effect until amended or rescinded by further promulgation.

Given under my hand and under the Seal of Radford University, this date day of September, 2008.

Penelope W. Kyle
President
Radford University

Attest:
Witness
Approval and Implementation

This document introduces the plan, outlines its applicability, and indicates that it supersedes all previous plans. It must include a date and be signed by the senior elected official(s).

RESOLUTION OF ADOPTION

WHEREAS, the Board of Visitors of Radford University is concerned with the health and well-being of its students, facility and staff and desires that the best possible emergency service be available to them; and, the President is concerned with the health and well-being of its students, facility and staff and desires that the best possible emergency service be available to them; and

WHEREAS, the Code of Virginia Chapter 1 of Title 23 states that all public institutions of higher education shall develop, adopt, and keep current a written crisis and emergency management plan; and every four years, each institution shall conduct a comprehensive review and revision of its crisis and emergency management plan to ensure the plan remains current, and the revised plan shall be adopted formally by the board of visitors or other governing body. Such review shall also be certified in writing to the Department of Emergency Management; and

WHEREAS, such a plan has been developed by Radford University Staff in coordination with the Virginia Department of Emergency Management with input from university departments and the City of Radford Emergency Management Agency;

NOW THEREFORE BE IT RESOLVED that the Radford University Board of Visitors, on this # day of September, 2008, does hereby officially adopt the Radford University Emergency Operations Plan, to include plans and procedures for both peace time and war-caused disasters. * * * * *

I, name, do hereby certify that the foregoing writing is a true, correct copy of a resolution unanimously adopted by the Board of Visitors of Radford University at a meeting held on September Day, 2008.

II. Introduction

Radford University is vulnerable to a variety of hazards such as flash flooding, major river flooding, hurricanes, winter storms, tornadoes, hazardous materials incidents, resource shortages and terrorism. To respond effectively to any emergency of a size or complexity beyond routine response systems, it is critical that all University staff, City of Radford public officials, departments and agencies, non-governmental emergency organizations, students, and the public understand their roles and responsibilities. These non-routine responsibilities begin as the incident is recognized and response ensues, and become particularly important as command organizes beyond the initial reactive phase of first responders.

A planned-for and coordinated response on the part of state and local officials in support of in-the-field emergency responders can save lives, protect property, and more quickly restore essential services. The foundation for this coordinated response is established through the Radford University Emergency Operations Plan. The "Commonwealth of Virginia Emergency Services and Disaster Laws of 2000" (Code of Virginia, § 44-146.13 to 44-146.29:2 requires that state and local governments develop and maintain current Emergency Operations Plans (EOP) in order to be prepared for such events.

The Radford University Emergency Operations Plan (EOP) consists of a basic plan followed by the Emergency Support Functions, Incident Annexes, and finally Support Annexes.

Purpose

The purpose of the Basic Plan is to establish the legal and organizational basis for operations at Radford University to effectively respond to and recover from all-hazards disasters and/or emergency situations. It assigns broad responsibilities to University Departments and support organizations for all-hazards disaster prevention, preparedness, response, and recovery. These responsibilities are generally extensions of normal, day-to-day functions involving the same personnel and material resources. Supporting plans for all-hazards disasters set forth the concepts and procedures whereby the university can effectively apply available resources to insure that casualties and property damage will be minimized and that essential services will be restored as soon as possible following an emergency or disaster situation.
Scope and Applicability

The Emergency Operations Plan identifies a range of disasters that could possibly occur on or near this campus. The EOP works to anticipate the needs that the university might experience during an incident and provides guidance across campus departments, agencies, and response organizations by describing an overall emergency response system:

- How University Staff will be organized during response to an event including command authorities
- Critical actions and interfaces during response and recovery
- How the interaction between the University and local, regional, state, and federal authorities is managed
- How the interaction between the University and its private partner organizations (hospitals, non-governmental emergency organizations and others) is managed during emergencies
- How to handle and manage needs with the resources available.

The plan is applicable to all Radford University departments that may be requested to provide support.

Incident Management Activities

This plan addresses the full spectrum of activities related to local incident management including prevention, preparedness, response, and recovery actions. This plan focuses on those activities that are directly related to an evolving incident or potential incident.

Examples of incident management actions include:

- Emergency Levels for Radford University (See ESF#5 Tab 1)
- Increasing public awareness;
- Coordinating protective measures across the campus;
- Increasing countermeasures such as inspections, security, and infrastructure protection;
- Conducting public health assessments and conducting a wide range of prevention measures to include, but not limited to immunizations;
- Providing immediate and long-term public health and medical response assets;
- Coordinating support in the aftermath of an incident;
- Providing strategies for coordination of resources;
- Enabling immediate recovery activities, as well as addressing long-term consequences in the impacted area.
**Key Concepts**

A. Systematic and coordinated incident management, including protocols for:
   - Incident reporting;
   - Coordinated action;
   - Alert and Notification;
   - Mobilization of resources
   - Operating under differing threats; and
   - Integration of crisis and consequence management functions.

B. Proactive notification and deployment of resources in anticipation of or in response to catastrophic events including coordination and collaboration with Federal, State, private entities, and other local governments when possible.

C. Organizing interagency efforts to minimize damage, restore impacted areas to pre-incident conditions if feasible, and/or implement programs to mitigate vulnerability to future events.

D. Coordinate incident communication, worker safety and health, private-sector involvement, and other activities that are common to the majority of incidents.

E. Organizing Emergency Support Functions (ESF’s) to facilitate the delivery of critical resources, assets, and assistance. Departments and agencies are assigned to lead or support ESFs based on authorities, resources, and capabilities.

F. Providing mechanisms for coordination, communications, and information sharing in response to threats or incidents. These mechanisms facilitate coordination between Federal, State, local, and tribal entities of government, as well as between the public and private sectors.

G. Facilitating support to departments and agencies acting under the requesting departments or agency’s own authorities.

H. Developing detailed supplemental operations, tactical, and hazard-specific contingency plans and procedures.

I. Providing the basis for coordination of interagency and intergovernmental planning, training, exercising, assessment, coordination, and information exchange.
III. Planning Assumptions & Considerations

A. Incidents are typically managed at the lowest possible level of Management.

B. Incident Management activities will be initiated and conducted using the principles/directives contained in the National Incident Management System (NIMS).

C. The combined expertise and capabilities of government at all levels, the private sector, and nongovernmental organizations will be required to prevent, prepare for, respond to, and recover from disasters.

D. Incidents require University Staff to coordinate operations and/or resources that may:

   - Occur at any time with little or no warning;
   - Require significant information sharing across multiple departments and jurisdictions and between the public and private sectors;
   - Involve single or multiple geographic areas;
   - Have significant impact and/or require resource coordination and/or assistance;
   - Span the spectrum of incident management to include prevention, preparedness, response, and recovery;
   - Involve multiple, highly varied hazards or threats on a local or regional scale;
   - Result in numerous casualties; fatalities; displaced people; property loss; disruption of normal life support systems, essential public services and basic infrastructure; and significant damage to the environment.
   - Attract a sizeable influx of independent, spontaneous volunteers and supplies;
   - Require short notice State and Federal asset coordination;
   - Require prolonged, sustained incident management operations and support activities.

E. The top priorities for the University are to:

   - Save lives and protect the health and safety of the students, staff, responders, and recovery workers;
   - Ensure security of the campus;
   - Prevent an imminent incident from occurring;
   - Protect and restore critical infrastructure and key resources;
   - Ensure the University continues to function throughout the incident;
   - Protect property and mitigate damages and impacts to individuals, communities, and the environment; and
   - Facilitate recovery of individuals, staff, and the environment.
III. Roles and Responsibilities

University President

The University President, serving as the campus’s chief executive, is responsible for the public safety and welfare of the people of the University. The President:

- Is responsible for coordinating university resources to address the full spectrum of actions to prevent, prepare for, respond to, and recover from incidents involving all hazards including terrorism, natural disasters, accidents, and other contingencies;
- Dependent upon state and local laws, has extraordinary powers to suspend local laws and ordinances, such as to establish a curfew, direct evacuations, and in coordination with the District Health Director, to order a quarantine;
- Provides leadership and plays a key role in communicating to the public, and in helping people, businesses, and organizations cope with the consequences of any type of incident within the campus.

University Provost

The University Provost is responsible for all Academic Programs and Faculty Management. The Provost:

- Is responsible for assuring that all academic studies continue as uninterrupted as possible;
- Maintains the quality of instruction through alternative delivery methods;
- Schedules of all academic instruction during emergencies;
- Serves as Chief Executive Officer due to an unavailability of the President with all the authorities granted.

Vice President of Finance and Administration

The Vice President of Finance and Administration serves as the Chief Financial Officer for the University. The Vice President:

- Is responsible for maintaining the financial records of the University;
- Authorizes emergency expenditures and maintaining accurate records of expenses related to the emergency;
- Receives monetary donations to the University in times of emergencies;
- Serves as the Chief Executive Officer due to the unavailability of the President and Provost with all authorities granted.
- Communicates with the Cabinet to coordinate response affects
- Provides administrative support to continue as uninterrupted as possible.
Vice President of Student Affairs

The Vice President of Student Affairs serves as the Chief Student Affairs Officer. The VP oversees all aspects of student life while on campus.

The Vice President:

- Is responsible for all aspects of student life on campus
- Serves as Cabinet Level Administrator for the RU Police Department
- Provides administrative support to continue the Academic mission as uninterrupted as possible

Vice President of Information Technology

The Vice President of Information Technology serves as the Chief Information Officer for the University. The Vice President:

- Is responsible for maintaining the data and voice network infrastructure in times of emergencies;
- Maintains operations of critical information systems;
- Provides technology assistance and support to continue as uninterrupted as possible.

University departments and agencies participate in the Emergency Support Function (ESF) structure as coordinators, primary response agencies, support agencies, and/or as required to support incident management activities.

Emergency Support Functions

The Emergency Support Function is a grouping of government and certain private-sector capabilities into an organizational structure to provide support, resources, program implementation, and emergency services that are most likely to be needed during incidents.

Each ESF is composed of primary and support agencies. The University identifies primary agencies on the basis of authorities, resources, and capabilities. Support agencies are assigned based on resources and capabilities in a given functional area. (See Tab 4 – Matrix of Responsibilities). ESFs are expected to support one another in carrying out their respective roles and responsibilities. Additional discussion on roles and responsibilities of ESF coordinators, primary agencies, and support agencies can be found in the introduction to the ESF annexes.

Note that not all incidents result in the activation of the ESFs. It is possible an incident may be addressed without activating the ESFs.

Nongovernmental and Volunteer Organizations
Nongovernmental organizations collaborate with first responders, governments at all levels, and other agencies and organizations providing relief services to sustain life, reduce physical and emotional distress, and promote recovery of disaster victims when assistance is not available from other sources. For example, a local American Red Cross chapter provides relief at the local level and also provides staffing of ESF #6 – Mass Care. The Virginia Voluntary Organizations Active in Disaster (VVOAD) is a group of recognized local, state, and national organizations that provide disaster relief. VVOAD provides significant capabilities to incident management and response efforts.

Local Disaster Recovery Task Forces also provide for individuals, families, and businesses who have applied for available state and federal assistance but who may still have unmet needs.

**Private Sector**

Primary and support agencies coordinate with the private sector to effectively share information, form courses of action, and incorporate available resources to prevent, prepare for, respond to, and recover from disasters. The roles, responsibilities and participation of the private sector during disaster vary based on the nature of the organization and the type and impact of the disaster. The roles of the private sector organizations are summarized below.

<table>
<thead>
<tr>
<th>Type of Organization or Infrastructure</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impacted Organization or Infrastructure</td>
<td>Private sector organizations may be affected by direct or indirect consequences of the incident, including privately owned critical infrastructure, key resources, and those main private sector organizations that are significant to local economic recovery. Examples of privately owned infrastructure include transportation, telecommunications, private utilities, financial institutions, and hospitals.</td>
</tr>
<tr>
<td>Response Resource</td>
<td>Private sector organizations provide response resources (donated or compensated) during an incident—including specialized teams, equipment, and advanced technologies—through local public-private emergency plans, mutual aid agreements, or incident specific requests from local government and private sector volunteered initiatives.</td>
</tr>
<tr>
<td>Regulated and/or Responsible Party</td>
<td>Owners/operators of certain regulated facilities or hazardous operations may bear responsibilities under the law for preparing for and preventing incidents from occurring, and responding to an incident once it occurs.</td>
</tr>
<tr>
<td>Local Emergency Organization Member</td>
<td>Private sector organizations may serve as an active partner in local emergency preparedness and response organizations and activities, such as membership on the Local Emergency Planning Committee (LEPC).</td>
</tr>
</tbody>
</table>
Private sector organizations support emergency management by sharing information with the local government, identifying risks, performing vulnerability assessments, developing emergency response and business continuity plans, enhancing their overall readiness, implementing appropriate prevention and protection programs, and donating or otherwise providing goods and services through contractual arrangement or government purchases to assist in response and recovery activities.

Private sector organizations are encouraged to develop and maintain capabilities to respond and to manage a complete spectrum of incidents and emergencies. Radford University and the City of Radford maintain ongoing interaction with the critical infrastructure and key resources and industries to provide coordination of prevention, preparedness, response and recovery activities. Private sector representatives should be included in planning and exercises.

**Citizen Involvement**

Strong partnerships with citizen groups and organizations provide support for incident management prevention, preparedness, response, recovery, and mitigation.

The Citizen Corps brings these groups together and focuses efforts of individuals through education, training, and volunteer services to help make communities safer, stronger, and better prepared to address all-hazards incidents. The Citizen Corps works through a national network of state and local Citizen Corp Councils, which bring together leaders from law enforcement, fire, emergency medical, and other emergency management volunteer organizations, local elected officials, the private sector, and other community stakeholders.

The Citizen Corps Council implements the Community Emergency Response Teams (CERT), Medical Reserve Corps (MRC), Neighborhood Watch, Volunteers in Police Service, and the affiliate programs and provides opportunities for special skills and interests. These programs develop targeted outreach for special needs groups and organize special projects and community events.

Radford University and the City of Radford currently have __0___ CERT teams, with approximately ____0____ volunteers available to assist with emergency preparedness, response and recovery activities.
IV. Concept of Operations

General

This section describes the local coordinating structures, processes, and protocols employed to manage incidents. These coordinating structures and processes are designed to enable execution of the responsibilities of local government through the appropriate departments and agencies, and to integrate State, Federal, nongovernmental organizations and private sector efforts into a comprehensive approach to incident management.

1. *The Commonwealth of Virginia Emergency Services and Disaster Law of 2000*, as amended, provides that emergency services organizations and operations will be structured around existing constitutional government. Radford University’s organization for emergency operations consists of existing university departments, nongovernmental, and private sector emergency response organizations.

2. The Coordinator of Emergency Preparedness is a designated University Employee. The day-to-day activities of the emergency preparedness program have been delegated to him/her. The Coordinator of Emergency Preparedness will direct and control emergency operations in time of emergency and issue directives to other services and organizations concerning disaster preparedness. The Vice President for University Relations will be responsible for emergency public information.

3. The Coordinator of Emergency Preparedness, assisted by department heads, will develop and maintain a primary Emergency Operations Center (EOC) from which to direct operations in times of emergency. The primary EOC is currently located in the Allen Building. The alternate EOC facilities are located in the Fraternal Order of Police (FOP) building on Pulaski St. and Calhoun Hall.

4. The day-to-day activities of the emergency preparedness program, for which the Coordinator is responsible, include developing and maintaining an Emergency Operations Plan along with other responsibilities as outlined in the employment Scope of Work.

5. The Coordinator of Emergency Preparedness or, in his/her absence, the Director of Emergency Preparedness, President, and or Chief of Police will determine the need to evacuate large areas and will issue orders for evacuation or other protective action as needed. Radford University Police will implement evacuation and provide security for the evacuated area. In the event of a hazardous materials incident, the Radford City Fire Chief or his representative on the scene should implement immediate protective action to include evacuation as appropriate.

6. Succession to the Coordinator of Emergency Preparedness will be the Director of Emergency Preparedness, University Police Chief, Police Captain, and the Commander of Patrol & Administration.
7. The Department Managers will maintain plans and procedures in order to be prepared to effectively accomplish their assigned responsibilities.

8. The Coordinator of Emergency Preparedness will assure compatibility between the University’s Emergency Operations Plan and the plans and procedures of key facilities and private organizations within the city as appropriate.

9. Radford University must be prepared to bear the initial impact of a disaster on its own. Help may not be immediately available from the local, state, or federal government after a natural or man-made disaster. All appropriate locally available forces and resources will be fully committed before requesting assistance from the state. Requests for assistance will be made through the Radford City EOC and/or State EOC to the State Coordinator.

10. The Coordinator of Emergency Preparedness or, in his absence, the Director of Emergency Preparedness with support from designated local officials, will exercise direction and control from the EOC during disaster operations. The EOC may be partially or fully staffed depending on type and scope of the disaster. The EOC will provide logistical and administrative support to response personnel deployed to the disaster site(s). Available warning time will be used to implement increased readiness measures, which will insure maximum protection of the population, property, and supplies from the effects of threatened disasters.

11. Department Managers will develop and maintain detailed plans and standing operating procedures necessary for their departments to effectively accomplish their assigned tasks. Department Managers will identify sources from which emergency supplies, equipment, and transportation may be obtained promptly when required. Accurate records of disaster-related expenditures will be maintained. All disaster-related expenditures will be documented to provide a basis for reimbursement if federal disaster assistance is needed. In time of emergency, the heads of university offices, departments, and agencies will continue to be responsible for the protection and preservation of records essential for the continuity of government operations. Department and agency heads will establish lists of succession of key emergency personnel.

12. Day-to-day functions that do not contribute directly to the emergency response may be suspended for the duration of any emergency. Efforts that would normally be required of those functions will be redirected to accomplish the emergency task by the agency concerned.

13. Declaration of a Local Emergency

   a. The City Council of the City of Radford by resolution, should declare an emergency to exist whenever the threat or actual occurrence of a disaster is, or threatens to be, of sufficient severity and magnitude to require significant expenditures and a coordinated response in order to prevent or alleviate damage, loss, hardship, or suffering.

   b. A local emergency may be declared by the Director of Emergency Management with the consent of the City Council of the City of Radford (see Section 44-146.21, Virginia Emergency Services and Disaster Law). The
declaration of a local emergency activates the City of Radford Emergency Operations Plan and authorizes the provision of aid and assistance there under. It should be declared when a coordinated response among several local agencies/organizations must be directed or when it becomes necessary to incur substantial financial obligations in order to protect the health and safety of persons and property or to provide assistance to the victims of a disaster.

c. A declaration of a local emergency activates the response and recovery programs of all applicable local and inter-jurisdictional Emergency Operations Plans and authorizes the furnishing of aid and assistance in accordance with those plans. In the event the City Council cannot convene due to the disaster, the Director of Emergency Management, or any other Emergency Management staff in his absence, may declare a local emergency to exist subject to confirmation of the entire City Council within fourteen days. The Director of Emergency Management or, in his absence, the Coordinator will advise the Virginia EOC immediately following the declaration of a local emergency. All disaster-related expenditures must be documented in order to be eligible for post-disaster reimbursement should a federal disaster be declared.

d. When local resources are insufficient to cope with the effects of a disaster and the county requests state assistance, the following procedures will apply. The Director of Emergency Management, by letter to the State Coordinator of Emergency Management, will indicate that a local emergency has been declared, the local Emergency Operations Plan has been implemented, available resources have been committed and state assistance is being requested. A copy of the resolution declaring a local emergency to exist should accompany this letter.

14. The Virginia Emergency Operations Plan requires the submission of the following reports by local government in time of emergency. These reports are available using the online Emergency Operations Center (EOC).

- Daily Situation Report
- Initial Damage Assessment Report
- Request for Assistance Form

15. Support by military units may be requested through the State EOC. Military forces, when made available, will support and assist local forces and may receive from the local Director of Emergency Management or his designated representative, mission-type requests, to include objectives, priorities, and other information necessary to accomplish missions.

16. Emergency assistance may be made available from neighboring jurisdictions in accordance with mutual aid agreements. Emergency forces may be sent from the City and/or County to assist adjoining jurisdictions. Such assistance will be in accordance with existing mutual aid agreements or, in the absence of official agreements, directed by the Director of Emergency Management or, in his absence, the Coordinator of Emergency Management determines that such assistance is necessary and feasible.
17. The City Director of Emergency Management, the Coordinator of Emergency Management, and the Department of Social Services will assist disaster victims in obtaining post-disaster assistance, such as temporary housing and low-interest loans.

18. This plan is effective as a basis for training and pre-disaster preparedness upon receipt. It is effective for execution when:

   a. Any disaster threatens or occurs in the city and a local disaster is declared under the provisions of Section 44-146.21, the Commonwealth of Virginia Emergency Services and Disaster Law of 2000, as amended.

   b. A State of Emergency is declared by the Governor.

19. The Coordinator of Emergency Preparedness has overall responsibility for maintaining and updating this plan. It should be updated, improved based on lessons learned, and republished following an actual emergency situation. In the absence of such a situation, it should be updated annually, preferably after a training exercise or drill, as needed. The Emergency Coordinator is responsible for review and submission and to have the EOP readopted every four years. The Virginia Department of Emergency Management provides guidance and assistance. A plan distribution list must be maintained. Responsible individuals and officials should recommend to the Coordinator of Emergency Preparedness appropriate improvements and changes as needed based on experiences in emergencies, deficiencies identified through drills and exercises, and changes in government structure.

Concurrent Implementation of Other Plans

The Radford University Emergency Operations Plan is the core plan for managing incidents and details the campus coordinating structures and processes used during incidents. Other supplemental agency and interagency plans provide details on the authorities, response protocols, and technical guidance for responding to and managing specific contingency situations (such as hazardous materials spills, wild land fires, etc.). In many cases these local agencies manage incidents under these plans using their own authorities. These supplemental agency or interagency plans may be implemented concurrently with the Emergency Operations Plan (EOP) but are subordinated to the overarching core coordinating structures, processes, and protocols detailed in the EOP.
Organizational Structure

In accordance with the NIMS process, resource and policy issues are addressed at the lowest possible organizational level. If issues cannot be resolved at that level, they are forwarded up to the next level. Reflecting the NIMS construct and in alignment with the National Response Plan, the Emergency Operations Plan includes the following command and coordination structures:

- Incident Command Posts, on-scene using the Incident Command System;
- Area Command (if needed);
- Emergency Operations Centers;
- Joint Field Office, which is responsible for coordinating Federal assistance and supporting incident management activities locally;
- Local Department of Emergency Management;
- Director of Emergency Preparedness;
- Coordinator of Emergency Preparedness and
- Incident Commander.

V. Incident Management Actions

Actions

This section describes incident management actions ranging from initial threat notification to early coordination efforts to assess and disrupt the threat, to preparatory activation of the ESF structure, to deployment of resources in support of incident response and recovery operations. These actions do not necessarily occur in sequential order and many may be undertaken concurrently in response to single or multiple threats or incidents.

Notification and Assessment

University and nongovernmental organizations report threats, incidents, and potential incidents using established communications and reporting channels. Once a threat or incident has occurred, University Staff, through the Coordinator of Emergency Preparedness, makes an initial determination to initiate the coordination of information-sharing and incident management activities.

Reporting Requirements

Local Emergency Management is required to report a Declaration of Emergency to the Virginia EOC and encouraged to report all incidents of significance to the VEOC. In most situations, incident information is reported using existing mechanisms to the VEOC. This information may include:

- Implementation of an incident management or emergency operations plan or action to prevent, respond to, or recover from an incident; and
• Activation of local and state mutual-aid agreements in response to incidents resulting in emergency proclamation or declarations, or requiring Federal assistance.

Dissemination of Warnings and Bulletins

Watches, warnings, and other emergency bulletins are issued by various agencies based on their statutory missions and authorities. Information on dissemination of public information can be found in the Public Affairs Support Annex and ESF # 15. A variety of communications systems may be used at the Federal level to disseminate information, such as:

• National Warning System (NAWAS): NAWAS is the primary system for emergency communications from the Federal Government to both State and local warning points;
• Washington Area Warning System (WAWAS): Although not directly tied to the NAWAS circuits, WAWAS is a mechanism for providing emergency communications to Washington, D.C. area officials in the event of an emergency;
• National Emergency Alert System (National EAS): Formerly known as the Emergency Broadcast System, the National EAS is a nationwide network of readily available and reliable means to communicate emergency information to the American people; and
• State and Local EAS: State and local authorities have their own EAS which may be used to broadcast information on major disasters or emergencies.

Pre-Incident Actions

The majority of initial actions in the threat or hazard area is taken by first responders and local government authorities, and includes efforts to protect the public and minimize damage to property as follows:

• **Public Health and Safety:** Initial Safety efforts focus on actions to detect, prevent, or reduce the impact to public health and safety. Such actions can include environmental analysis, plume modeling, evacuations, emergency sheltering, air monitoring, decontamination, emerging infectious disease tracking, emergency broadcasts, etc. These efforts may also include public health education; site and public health surveillance and testing procedures; and immunizations; prophylaxis, and isolation or quarantine for biological threats.

• **Responder Health and Safety:** The safety and health of responders is also a priority. Actions essential to limit their risks include full integration of deployed health and safety assets and expertise; risk assessments based upon timely and accurate data, and situational awareness that considers responder and recovery worker safety.

• **Property and Environment:** Responders may also take incident management actions to protect public and private property and the environment. Such actions may include sandbagging in anticipation of a flood, or booming of environmentally sensitive areas in response to a potential oil spill.
Response Actions

Once an incident occurs, the priorities shift from prevention, preparedness, and incident mitigation to immediate and short-term response activities to preserve life, property, the environment, and the social, economic, and political structure of the university.

Response actions include immediate law enforcement, fire, emergency medical services; emergency flood fighting; evacuations; transportation system detours; emergency public information; actions taken to minimize additional damage; urban search and rescue; the provision of public health and medical services, food, ice, water, and other emergency essentials; debris clearance; the emergency restoration of critical infrastructure; control, containment, and removal of environmental contamination; and protection of responder health and safety.

In the context of a single incident, once immediate response missions and life-saving activities conclude, the emphasis shifts from response to recovery operations, and if applicable, hazard mitigation. The Planning Section develops a demobilization plan for the release of appropriate resources.

Recovery Actions

Recovery involves actions needed to help individuals and communities return to normal when feasible. The Joint Field Office (JFO) is the central coordination point among Federal, State and Local agencies and voluntary organizations for delivering recovery assistance programs.

The JFO Operations Section includes the Human Services Branch, the Infrastructure Support Branch, and the Community Recovery and Mitigation Branch. The Human Services and Infrastructure Support Branches assess state and local recovery needs at the outset of an incident and develop relevant timeframes for program delivery. The Community Recovery and Mitigation Branch works with the other Operations branches and state and local officials to assess the long-term impacts of an incident, define available resources, and facilitate the development of a course of action to most efficiently apply available resources to restore and revitalize the community as well as reduce the impact from future disasters.

The above branches coordinate with one another to identify appropriate agency assistance programs to meet applicant needs. Hazard Mitigation measures are identified in concert with congressionally mandated, locally developed plans. Hazard Mitigation Risk Analysis; technical assistance to state and local governments, citizens, and businesses; and grant assistance are included with the mitigation framework. These branches work in tandem to track overall progress of the recovery effort, particularly noting potential program deficiencies and problem areas.

Long-term environmental recovery may include cleanup and restoration of public facilities, businesses, and residences; re-establishment of habitats and prevention of subsequent damage to natural resources; protection of cultural or archeological sites; and protection of natural, cultural, and historical resources from intentional damage during other recovery operations.
Mitigation Actions

Hazard Mitigation involves reducing or eliminating long-term risk to people and property from hazards and their side effects. The JFO is the central coordination point among Federal, State and Local agencies and nongovernmental organizations for beginning the process that leads to the delivery of mitigation assistance programs.

The JFO’s Community Recovery and Mitigation Branch is responsible for coordinating the delivery of all mitigation programs within the affected area, including hazard mitigation for:

- Grant programs for loss reduction measures (if available);
- Delivery of loss reduction building-science expertise;
- Coordination of Federal Flood Insurance operations and integration of mitigation with other program efforts;
- Conducting flood recovery mapping to permit expedited and accurate implementation of both recovery and mitigation programs;
- Predictive modeling to protect critical assets;
- Early documentation of losses avoided due to previous hazard mitigation measures; and
- Community education and outreach necessary to foster loss reduction.

The Community Recovery and Mitigation Branch works with the Infrastructure and Human Services Branches and with state and local officials to facilitate the development of a long-term recovery strategy for the impacted area.

VI. Ongoing Plan Management and Maintenance

Coordination

The university should conduct a comprehensive plan review and revision, and exercise prior to formal adoption by the President and the Radford University Board of Visitors every four years in order to maintain plan currency. It is also suggested that plans be updated and reviewed yearly.

- The Virginia Emergency Services and Disaster Law of 2000, as amended, requires that each town and county prepare and keep current an emergency operations plan.
- The Coordinator of Emergency Preparedness will update the Emergency Operations Plan annually in conjunction with the LEPC. The Coordinator will coordinate with each emergency resource organization and assure the development and maintenance of an appropriate emergency response capability.
In the event an incident exceeds local emergency response capabilities, outside assistance is available, either through mutual support agreements with nearby jurisdictions and volunteer emergency organizations or, through the Virginia Emergency Operations Center (VEOC). A local emergency must be declared and local resources must be fully committed before state and federal assistance is requested.
Tab 1 – Glossary of Key Terms

Amateur Radio Emergency Services
A public service organization of licensed amateur radio operators who have voluntarily registered their qualifications and equipment to provide emergency communications for public service events as needed

American Red Cross
An organization charged by statute and agreements with the responsibility of helping meet the human needs of disaster victims.

Command Section
One of the five functional areas of the Incident Command System. The function of command is to direct, control, or order resources, including people and equipment, to the best possible advantage.

Command Post
That location at which primary Command functions are executed; usually collocated with the Incident Base. Also referred to as the Incident Command Post.

Comprehensive Resource Management
Maximizes the use of available resources, consolidates like resources and reduces the communications load on the Incident Command Operation.

Coordination
The process of systemically analyzing a situation, developing relevant information, and informing appropriate personnel of viable alternatives for selection of the most effective combination of available resources to meet specific objectives.

Declaration of Emergency
Whenever, in the opinion of the Governor, the safety and welfare of the people of the state require the exercise of extreme emergency measures due to a threatened or actual disaster, he may declare a state of emergency to exist.

Decontamination
The process of making people, objects, or areas safe by absorbing, destroying, neutralizing, making harmless, or removing the Hazardous Materials/HAZMAT

Emergency/Disaster/Incident
An event that demands a crisis response beyond the scope of any single line agency or service and that presents a threat to a community or larger area. An emergency is usually an event that can be controlled within the scope of local capabilities; a major emergency or disaster usually requires resources beyond what is available locally.

Emergency Alert System
A network of broadcast stations interconnecting facilities authorized by the Federal Communications Commission (FCC) to operate in a controlled manner to warn and inform the public of needed protective actions in the event of a disaster or emergency situation.
**Emergency Operations Center**
A facility from which government directs and controls its emergency operations; where information about the status of the emergency situation is officially collected, assimilated, and reported on; where coordination among response agencies takes place; and from which outside assistance is officially requested.

**Emergency Response Plan**
A document which provides for a preplanned and coordinated response in the event of an emergency or disaster situation.

**Emergency Management**
The preparation for and the carrying out of functions (other than functions for which military forces are primarily responsible) to prevent, minimize, and repair injury and damage resulting from natural or manmade disasters. These functions include firefighting, police, medical and health, rescue, warning, engineering, communications, evacuation, resource management, plant protection, restoration of public utility services, and other functions related to preserving the public health, safety, and welfare.

**Emergency Support Function**
A function which takes agencies to provide or to coordinate certain resources in response to emergencies or disasters.

**Exercise**
An activity designed to promote emergency preparedness; test or evaluate emergency operations plans, procedures, or facilities; train personnel in emergency response duties, and demonstrate operational capability. There are three specific types of exercises: tabletop, functional, and full scale.

**Evacuation**
Assisting people to move from the path or threat of a disaster to an area of relative safety.

**Federal Disaster Assistance**
Aid to disaster victims and/or state and local governments by federal agencies under provisions of the Booker T. Stafford Relief and Emergency Assistance Act of 1988 (PL 93-288).

**National Response Plan**
Establishes a process and structure for the systematic, coordinated, and effective delivery of federal assistance to address the consequences of any major disaster or emergency.

**Geographic Information System**
A computer system capable of assembling, storing, manipulating, and displaying geographically referenced information, i.e., data identified according to their locations.

**Hazardous Materials**
Substances or materials which may pose unreasonable risks to health, safety, property, or the environment when used, transported, stored or disposed of, which may include materials which are solid, liquid, or gas. Hazardous materials may include toxic
substances, flammable and ignitable materials, explosives, or corrosive materials, and radioactive materials.

**Hazardous Materials Emergency Response Plan**
The plan was developed in response to the requirements of Section 303 (a) of the Emergency Planning and Community Right-to-Know Act (Title III) of Superfund Amendments and Reauthorization Act of 1986. It is intended to be a tool for our community's use in recognizing the risks of a hazardous materials release, in evaluating our preparedness for such an event, and in planning our response and recovery actions. This plan is separate from the county's Emergency Operations Plan.

**Incident Command System**
A model for disaster response that uses common terminology, modular organization, integrated communications, unified command structure, action planning, manageable span or control, pre-designed facilities, and comprehensive resource management. In ICS there are five functional elements: Command, Operations, Logistics, Planning and Finance/Administration.

**Incident Commander**
The individual responsible for the management of all incident operations.

**Initial Damage Assessment Report**
A report that provides information regarding overall damage to public and private property, thereby providing a basis for emergency declaration and/or disaster assistance.

**Integrated Communications Plan**
This plan coordinates the use of available communications means and establishes frequency assignments for certain functions.

**Joint Information Center**
A collocated group of representatives from agencies and organizations involved in an event that are designated to handle public information needs. A JIC is a centralized “communication hub” that serves to achieve that information flow.

**Local Emergency**
The condition declared by the local governing body when, in its judgment, the threat or actual occurrence of a disaster is or threatens to be of sufficient severity and magnitude to warrant coordinated local government action to prevent, or alleviate loss of life, property damage, or hardship. Only the Governor, upon petition of a local governing body, may declare a local emergency arising wholly or substantially out of a resource shortage when he deems the situation to be of sufficient magnitude to warrant coordinated local government action to prevent or alleviate the hardship or suffering threatened or caused thereby.

**Local Emergency Planning Committee**
Appointed representatives of local government, private industry, business, environmental groups, and emergency response organizations responsible for ensuring that the hazardous materials planning requirements of the Superfund Amendments and Reauthorization Act of 1986 (SARA Title III) are complied with.

Basic Plan-25
Mitigation
Activities that actually eliminate or reduce the chance occurrence or the effects of a disaster. Examples of mitigation measures include, but are not limited to, the development of zoning laws and land use ordinances, State building code provisions, regulations and licensing for handling and storage of hazardous materials, and the inspection and enforcement of such ordinances, codes and regulations.

Mobile Crisis Unit
A field response tram staffed and operated by mental health professionals specially trained in crisis intervention. The Mobile Crisis Unit is available to provide on-scene crisis intervention to incident victims and to follow up work with victims and formal Critical Incident Stress Debriefings for service providers after the incident has been brought under control.

Mutual Aid Agreement
A written agreement between agencies and/or jurisdictions in which they agree to assist one another, upon request, by furnishing personnel and equipment in an emergency situation.

National Weather Service
The federal agency which provides localized weather information to the population, and during a weather-related emergency, to state and local emergency management officials.

Preparedness
The development of plans to ensure the most effective, efficient response to a disaster or emergency. Preparedness activities are designed to help save lives and minimize damage by preparing people to respond appropriately when an emergency is imminent. Preparedness also includes establishing training, exercises and resources necessary to achieve readiness for all hazards, including Weapons of Mass destruction incidents.

Presidential Declaration
A presidential declaration frees up various sources of assistance from the Federal government based on the nature of the request from the governor.

Primary Agency
While several University departments will be performing varied and critical tasks during a disaster, in most cases only one agency will be considered the ‘primary agency.’ The primary agency shall be responsible for detailed planning, testing, and evaluation of their respective emergency support function. The Department Director of the primary agency shall serve as the principle advisor to the University President during the response and recovery phase. In addition, the Department Director or the primary agency must assure that essential operations of his/her agency will continue, unless otherwise directed by the University President, or his/her designee.

Regional Information Coordination Center
The center facilitates communications and coordination among local, state, and federal government authorities to ensure an effective and timely response to regional emergencies and incidents, including coordination of decision-making regarding events such as closings, early release of employees, evacuation, transportation decisions, health response, etc.
**Situation Report**
A form which, when completed at the end of each day of local Emergency Operations Center operations, will provide the University with an official daily summary of the status of an emergency and of the local emergency response. A copy should be submitted to the State EOC via fax or submitted through the Virginia Department of Emergency Management website.

**Span of Control**
As defined in the Incident Command System, Span of Control is the number of subordinates one supervisor can manage effectively. Guidelines for the desirable span of control recommend three to seven persons. The optimal number of subordinates is five for one supervisor.

**State of Emergency**
The condition declared by the Governor when, in his judgment, a threatened or actual disaster in any part of the State is of sufficient severity and magnitude to warrant disaster assistance by the State to supplement local efforts to prevent or alleviate loss of life and property damage.

**Superfund Amendments and Reauthorization Act of 1986**
Established Federal regulations for the handling of hazardous materials.

**Unified Command**
Shared responsibility for overall incident management as a result of a multi-jurisdictional or multi-agency incident. In the event of conflicting priorities or goals, or where resources are scarce, there must be a clear line of authority for decision-making. Agencies contribute to unified command by determining overall goals and objectives, jointly planning for tactical activities, conducting integrated tactical operations and maximizing the use of all assigned resources.

**Weapons of Mass Destruction**
Any explosive, incendiary, or poison gas, bomb, grenade, rocket having a propellant charge of more than 4 ounces, or a missile having an explosive incendiary charge of more than 0.25 ounce, or mine or device similar to the above; poison gas; weapon involving a disease organism; or weapon that is designed to release radiation or radioactivity at a level dangerous to human life. (Source: 18 USC 2332a as referenced in 18 USC 921).

● Primary Role
○ Support Role
Continuity of emergency operations is critical to the successful execution of emergency operations. Therefore, the following lines of succession are specified in anticipation of any contingency, which might result in the unavailability of the ranking member of the administrative hierarchy. The decision-making authority for each organization or service function is listed below by position in decreasing order.

Declaration of Adoption
National Incident Management System

BE IT RESOLVED by the Council of ___________________ Department of Emergency Management as follows:

WHEREAS, at the request of the President, the Department of Homeland Security has developed the National Incident Management System (NIMS) for the purpose of unifying and coordinating all emergency responders’ efforts during disasters; and

WHEREAS, the Department of Homeland Security has directed all Federal, State, Territorial, Tribal, and local entities involved in emergency response to adopt NIMS; and

Whereas the Governor of the State of Virginia has similarly endorsed NIMS by proclaiming it the official basis for management of incident response in Virginia; and

WHEREAS, the NIMS will enable responders at all levels to work together more effectively and efficiently to manage domestic incidents no matter what the cause, size or complexity, including catastrophic acts of terrorism and natural disaster; and

WHEREAS, ___________________ Department of Emergency Management currently uses the Incident Command System (ICS) as referred to in NIMS; and

WHEREAS, ___________________ Department of Emergency Management recognizes the need for a single Incident Management System to be used by all local agencies and disciplines;

BE IT THEREFORE RESOLVED, that ___________________ Department of Emergency Management (DEM) adopts the National Incident Management System. That this system will be used at all incidents and drills, taught in all ___________________ local DEM training courses, and reflected in all DEM emergency mitigation, preparedness, response and recovery plans and programs.

____________________________________
Chairman, Board of Supervisors/City Council
WHEREAS the Board of Supervisors/City Council of _________________, Virginia recognizes the need to prepare for, respond to, and recover from natural and manmade disasters; and

WHEREAS _________________ City/County has a responsibility to provide for the safety and well being of its citizens and visitors; and

WHEREAS _________________ City/County has established and appointed a Director and Coordinator of Emergency Management.

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors/City Council of _________________ Virginia, this Emergency Operations Plan as revised is officially adopted, and

IT IS FURTHER RESOLVED AND ORDERED that the Director of Emergency Management, or his/her designee, are tasked and authorized to maintain and revise as necessary this document over the next four (4) year period or until such time be ordered to come before this board.

_______________________________________
Chairman, County Board of Supervisors
Mayor, City Council

ATTEST:

Emergency Support Function #1 - Transportation

Primary Agency
Facilities Management
Parking Enforcement

Secondary/Support Agencies
Law Enforcement
Office of Emergency Preparedness
City of Radford Public Schools
City of Radford Public Works
Virginia Department of Transportation
Private Contractors

Introduction

Purpose:
Emergency Support Function (ESF) #1 – Transportation assists local, federal, and state government entities and voluntary organizations requiring transportation capacity to perform response missions following a disaster or emergency. Emergency Support Function #1 will also serve as a coordination point between response operations and restoration of the transportation infrastructure.

Scope:
Assistance provided by ESF #1 includes, but is not limited to:
- Coordinating transportation activities and resources during the response phase immediately following an emergency or disaster;
- Facilitating damage assessments to establish priorities and determine needs of available transportation resources;
- Prioritization and/or allocation of all government transportation resources;
- Processing all transportation requests from university departments and emergency support functions. This ESF will coordinate evacuation transportation as its first priority; and
- Facilitate movement of the campus in coordination with other transportation agencies.

Policies:
- Local transportation planning will use the most effective means of transportation to carry out the necessary duties during an incident;
- Local transportation planning will recognize State and Federal policies, regulations, and priorities used to control movement of relief personnel, equipment, and supplies;
To facilitate the prompt deployment of resources, priorities for various incidents are developed and maintained through an interagency process led by local government prior to an incident. Each ESF is responsible for compiling, submitting, and updating information for inclusion in the ESF #1 prioritized shipments.

**Concept of Operations**

**General:**

The Emergency Operations Plan provides guidance for managing the use of transportation services and deployment of relief and recovery resources.

A disaster may severely damage the transportation infrastructure and interrupt transportation services. Most localized transportation activities will be hampered by lack of useable surface transportation infrastructure.

The damage to the transportation infrastructure may influence the means and accessibility level for relief services and supplies.

Disaster responses, which require usable transportation routes, will be difficult to coordinate effectively during the immediate post disaster period.

Clearing access routes will permit a sustained flow of emergency relief, although localized distribution patterns may be disrupted for a significant period.

All government transportation resources not being used for the emergency/disaster will be available for use.

All requests for transportation support will be submitted to the Emergency Operations Center for coordination, validation, and/or action in accordance with this Emergency Support Function.

**Organization:**

Radford University, in conjunction with the City of Radford, is responsible for coordinating resources needed to restore and maintain transportation routes necessary to protect lives and property during an emergency or disaster.

The City of Radford will provide a liaison and provide information on road closures, alternate routes, infrastructure damage and debris removal, rail and bus transit and restoration activities.

The City of Radford in conjunction with support agencies will assess the condition of highways, bridges, signals, rail and bus transit and other components of the transportation infrastructure and where appropriate:

- Close infrastructure determined to be unsafe;
- Post signing and barricades; and
- Maintain and restore critical transportation routes, facilities, and services.
**Actions**

- ESF #1 will develop, maintain, and update plans and procedures for use during an emergency;
- The personnel will stay up to date with education and training that is required for a safe and efficient response to an incident;
- Alert local primary agency representative of possible incident, and begin preparations for mobilization of resources;
- If necessary contact state or federal agencies and alert Secondary Agencies. Assess initial damage and work to decide on the priorities for reconstruction and restoration of critical transportation facilities;
- Keep record of all expenses, and continue through the duration of the emergency;
- Prepare appropriate facilities for possible use;
- Locality will communicate and inform the State EOC of actions and intentions;
- ESF #1 staff coordinates the use of transportation resources to fulfill mission assignments and follow established practices and procedures; and
- Continue to provide support where needed.

**Responsibilities**

**Primary Agency:**

- Partners with State and Federal departments as well as local industry to assess damage and impact on transportation and infrastructure;
- Coordinates and implements, response and recovery functions under Primary agency statutory authorities;
- Assists with determining the most viable transportation networks to, from and within the emergency or disaster area and regulates the use of these transportation networks; and
- Identifies resource requirements for transportation and coordinates their allocation.
Emergency Support Function #2 - Communication

Primary Agency
Office of Emergency Preparedness
Information Technology
University Relations
911 Centers

Secondary/Support Agencies
Law Enforcement
Local Telephone Service Provider
Wireless Providers
Amateur Radio
Campus Radio Station

Introduction

Purpose:
The purpose of Emergency Support Function #2 – Communication is to support public safety and other university departments by maintaining continuity of information and telecommunication equipment and other technical resources. ESF #2 in conjunction with ESF #15 is responsible for keeping faculty, staff, and students informed in regards to an emergency situation, provide guidance when appropriate to help save lives and protect property, and support university agencies with the restoration and reconstruction of telecommunications equipment, computers, and other technical resources. This section describes the university’s emergency communications, notification, and warning systems. The university will coordinate with the City of Radford Emergency Operations Center should outside assistance be required.

Scope:
ESF #2 works to accurately and efficiently transfer information during an incident. This ESF is also responsible for the technology associated with the representation, transfer, interpretation, and processing of data among people, places, and machines. Communication includes transmission, emission, or reception of signs, signals, writing, images, and sounds or intelligence of any natures by wire, radio, optical, or other electromagnetic systems.
Policies:

- The Emergency Communications Center (ECC) operates 24 hours a day, 7 days a week and serves as the 911 center and the university warning point;
- The ECC is accessible to authorized personnel only;
- The ECC staff will consist of the Communications Supervisor, Dispatchers, and other designated representatives. Support personnel to assist with communications, designated logistics, and administration will also be designated. The Communications Supervisor will be available for decision-making as required; and
- The ECC will initiate notification and warning to appropriate personnel.

Concept of Operations

General:

The Emergency Operations Plan provides guidance for managing emergency communications resources.

The University’s Communications Center is the point of contact for receipt of all warnings and notification of actual or impending emergencies or disaster. The dispatcher on duty will notify other key personnel, chiefs, and department heads as required by the type of report and standard operating procedures (SOP).

The Emergency Communications Center (ECC) is accessible to authorized personnel only. The ECC is most often the first point of contact for the campus. The ECC has the capability to access the University Emergency Alert Systems to deliver warnings to the campus community and the public. Use of all available forms of warning and notification will provide warning to the general public and special needs population.

The telephone companies will ensure that communications essential to emergency services are maintained. During a major disaster, additional telephone lines may be installed in the Emergency Operations Center (EOC) to coordinate emergency operations. At least one phone with a special publicized number will be reserved for "rumor control" to handle citizen inquiries. The Coordinator of Emergency Preparedness will coordinate with Information Technology to provide these services.

Amateur radio operators may provide emergency backup radio communications between the EOC and the State EOC, should normal communications be disrupted. They may also provide communications with some in-field operators.

It is important that while communicating, standard or common terminology is used so that multiple agencies are better able to interact and understand each other.

Should an evacuation become necessary, warning and evacuation instructions will be put out via the university mass notifications system, siren system, email, radio and TV. The Office of Emergency Preparedness and University Relations will develop and provide public information announcements and publications regarding evacuation procedures to include recommended primary and alternate evacuation routes, designated assembly points for those without transportation, rest areas and service
facilities along evacuation routes, if appropriate, as well as potential health hazards associated with the risk.

**Organization:**

The Coordinator of Emergency Preparedness will assure the development of SOPs on the part of each major emergency support service. Generally, each designated agency should maintain current notification rosters, designate and staff an official emergency control center, and establish procedures for reporting appropriate emergency information, and provide ongoing training to maintain emergency response capabilities. When an emergency threatens, available time will be used to implement increased readiness measures as listed in each annex to this plan. The Coordinator of Emergency Preparedness will assure that all actions are completed as scheduled. University Relations will represent and advise the Incident Commander on all public information. This includes rumors that are circulating the area, what local media are reporting, as well as warnings and emergency public information.

The EOC support staff will include a recorder, message clerk, and other support personnel as required relieving the decision-making group of handling messages, maintaining logs, placing maps, etc. An EOC wall map should be prepared and be readily accessible. A separate Reports Section should also be established as an adjunct to the EOC staff.

Radford University emergency communications are heavily dependent on the commercial telephone network. The telephone system is vulnerable to the effects of emergencies and disasters and to possible system overload due to increased usage. Technical failure, damage, or loss of telecommunications equipment could hamper communications or the ability to communicate with emergency personnel and the public throughout the campus. Mutual aid repeaters may not be available or may not be able to provide sufficient coverage or channel loading to compensate for technical failure or damage to telecommunications resources on the campus during an emergency.

Amateur radio operators and other nongovernmental volunteer groups used to assist with emergency radio communications support will be under the authority of the Director of Emergency Preparedness or the Coordinator of Emergency Preparedness. The amateur radio and other nongovernmental volunteer operators will be required to actively participate in regular training and exercises established by the Office of Emergency Preparedness.

**Actions**

- ESF #2 will establish a working arrangement between the Primary Agencies, the local Emergency Operations Center, and local news media;
- The ECC will initiate notification and warning of appropriate personnel. Landline telephones, mass notification systems, 2 way radio, and wireless telecommunications devices may be utilized to notify public officials, EOC staff, emergency personnel and others, as required;
- Emergency service vehicles equipped with public address systems may be used to warn the campus community;
• The Coordinator of Emergency Preparedness, Director of Emergency Preparedness, Police Supervisor, or his/her designee must authorize the use of the Emergency Alert System; and

• Emergency warning may originate at the federal, state, or local level of government. Timely warning requires dissemination to the campus by all available means:
  
  a. Emergency Communications Center  
  b. Emergency Alert System  
  c. Local radio and television stations  
  d. NOAA Weather Radio – National Weather Service  
  e. Mobile public address system  
  f. Telephone  
  g. General broadcast over all available radio frequencies  
  h. Newspapers  
  i. Amateur Radio Volunteers  
  j. Mass Notification Systems  
  k. Siren Systems

Responsibilities

• Develop and maintain primary and alternate communications system for contact with local jurisdictions, state agencies, nongovernmental and private sector agencies required for mission support;

• Ensure the ability to provide continued service as the Public Safety Answering Point (PSAP) for incoming emergency calls;

• Ensure communication lines and equipment essential to emergency services are maintained by the appropriate vendor;

• Provide additional staffing in the EOC to assist with communications functions;

• Develop and maintain an emergency communications program and plan;

• Provide telephone service providers with a restoration priority list for telephone service prior to and/or following a major disaster; and

• Maintain records of cost and expenditures and forward them to Finance Section Chief.
EMERGENCY NOTIFICATION PROCEDURES

Until the EOC is activated, the Radford University Dispatch Center will notify the following officials upon receipt of severe weather warnings, building fires, Active Threats, or when directed by an on-scene incident commander:

<table>
<thead>
<tr>
<th>Official</th>
<th>Home Phone</th>
<th>Work Phone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Director of Emergency Preparedness</td>
<td>540-731-0224</td>
<td>540-831-6696</td>
</tr>
<tr>
<td>Coordinator of Emergency Preparedness</td>
<td>276-699-1689</td>
<td>540-831-7155</td>
</tr>
<tr>
<td>Chief of Police</td>
<td></td>
<td>540-831-5500</td>
</tr>
<tr>
<td>Communications Supervisor</td>
<td></td>
<td>540-831-5500</td>
</tr>
<tr>
<td>Vice President of University Relations</td>
<td>540-257-0795</td>
<td>540-831-5083</td>
</tr>
</tbody>
</table>

Depending on the incident, the Director and/or Coordinator will notify the Provost, VP of Finance and Administration, and VP of Student Affairs. Once operational, the EOC will receive messages from the University Police, City 911 Center, and/or State EOC. It is then the responsibility of the Communications Center of the university to monitor message traffic and ensure that messages reach the Director of Emergency Preparedness or their designee.
**Level One Emergency**
If the need has arisen to notify faculty, staff, and students to an emergency situation the following should be used:
- Mass Notification System
- Signage System
- Cable Television if the emergency occurs after dark or during the weekends.

**Level Two Emergency**
- Mass Notification System
- Siren/PA System
- Cable Television/Campus Radio Station
- Signage system and Web Site to keep the campus updated to events and responses

**Level Three Emergency**
In the event of a Level Three Emergency, all methods of communication will be utilized to warn and update the campus community. Some system may be activated at a later time as information is obtained.
- Siren/PA System
- Mass Notification System
- Cable Television/Campus Radio Station
- Signage System and Web Sites along with internal emails

During the initial phase of the emergency, University Police and/or the Office of Emergency Preparedness will initiate all life safety and emergency communications as necessary for the immediate protection of the campus community. The University Police Department has the authority to change or modify the above recommendations for all warning systems initializations depending on conditions and time constraints presented until the Coordinator and/or Director of Emergency Preparedness arrives.
It is essential that information being sent to the campus community and the public should be coordinated and consistent. Once a representative from University Relations arrives at the EOC or Police Department, all following event public information will be communicated through this office. University Relations will work with the Office of Emergency Preparedness and/or the University Police Department to disseminate information to the campus community and the local media.

All University Emergency Systems can be activated by the Radford University Police, Office of Emergency Preparedness, and approved departments who may be needed to help in the dissemination of emergency information.

Emergency Support Function #3 – Facilities Management

Primary Agencies
Facilities Management
Facilities Planning and Construction

Secondary/Support Agencies
Office of Emergency Preparedness
City of Radford Public Works
City of Radford Water Authorities
Fire and EMS
Law Enforcement
Virginia Department of Transportation
Virginia Department of Environmental Quality
American Red Cross

Introduction

Purpose:
Emergency Support Function (ESF) #3 – Facilities Management will assess the overall damage to university property. ESF #3 will also conduct necessary inspections to ensure the integrity of buildings, assist with debris removal and ensure that any rebuilding complies with existing zoning and land-use regulations.

Scope:
ESF #3 is structured to provide public works and engineering-related support for the changing requirements of incident management to include preparedness, prevention, response, recovery, and mitigation actions. Activities within the scope of this function include:

• Conducting pre-and post-incident assessments of university infrastructure;
• Executing emergency contract support for life-saving and life-sustaining services;
• Providing technical assistance to include engineering expertise, construction management, and contracting and real estate services; and
• Providing emergency repair of damaged infrastructure and critical facilities.

Policies:

• Personnel will stay up to date with procedures through training and education;
• The Primary Agencies will develop work priorities in conjunction with other agencies when necessary; and
• Local authorities will obtain required waivers and clearances related to ESF #3 support.
Concept of Operations

General:

In a disaster, buildings and structures may be destroyed or severely damaged. Residences, public buildings, bridges, and other facilities may need to be reinforced or demolished to ensure safety. Public utilities may be damaged and be partially or fully inoperable. Access to the disaster areas may be dependent upon debris clearance and roadway repairs. Debris clearance and emergency road repairs will be given top priority to support immediate lifesaving emergency response activities.

Prompt assessment of the disaster area is required to determine critical response times and potential workloads. Early damage assessment must be made rapidly and be general in nature. Following an incident, a multitude of independent damage assessment activities will be conducted by a variety of organizations including the locality damage assessment teams, insurance companies, Virginia Department of Emergency Management, utility companies and federal agencies.

Organization:

The Coordinator of Emergency Preparedness will be responsible for deploying damage assessment teams, consolidating damage data and compiling reports. At the Incident Commander’s request, the Damage Assessment Teams’ first priority will be to assess the structural damage.

Local Damage Assessment Teams will assess damage to the extent of their resources and in their areas of expertise. The Health Department and the Safety Office may assist the Facilities Management Department with damage assessments related to health and safety hazards that may be caused by the disrupted disposal of sanitary wastes.

An Initial Damage Assessment Report will be completed by Coordinator of Emergency Preparedness and submitted to the Virginia Department of Emergency Management within 72 hours of the event, outlining the severity of the problems and the determination of need for further assistance. Federal/State supported damage assessment precedes delivery of a Presidential Disaster Declaration and defines the specific needs for a long-term recovery.

To minimize threats to public health, the Department of Public Works will serve as liaison with the Virginia Department of Environmental Quality (DEQ) and the County/Town Attorney to secure the necessary emergency environmental waivers and legal clearances that would be needed to dispose of emergency debris and materials from demolition activities. The Facilities Management Department will coordinate with DEQ to monitor disposal of debris materials.

The university departments mentioned will inspect all buildings for structural, electrical, gas, plumbing and mechanical damage following a disaster situation. They will ensure that any repairs or rebuilding that occurs following the incident will comply with the city and state building codes, zoning and land-use regulations and comprehensive plan.

The Local Building Official is responsible for determining the state of a building and placing notification on the facility. The building owner retains responsibility for deciding whether to demolish or restore the structure. During the recovery phase the Building
Official is responsible for the facilitation of the building permit issuance process and for the review and approval of the site-related and construction plans submitted for the rebuilding/restoration of residential and commercial buildings.

**Actions**

- Alert personnel to report to the EOC;
- Review plans;
- Begin keeping record of expenses and continue for the duration of the emergency;
- Prepare to make an initial damage assessment;
- Activate the necessary equipment and resources to address the emergency; and
- Coordinate response with local, state, federal departments and agencies.

**Responsibilities**

- Assist in conducting initial damage assessment;
- Submit initial damage assessment to EOC;
- Assist in coordinating response and recovery;
- Prioritize debris removal;
- Inspect buildings for structural damage; and
- Ensure all repairs comply with local building codes, zoning, land-use regulations and comprehensive plan.
1. All buildings within the area, regardless of damage are to be POSTED by the Damage Assessment Team members at the site.

2. One of the following three posters is to be used

   A. “SAFE FOR OCCUPANCY” GREEN POSTER
      No damage to structural elements.
      No damage to utilities.
      There is only minor damage to walls or roof affecting weather resistance.
      Generally 10% or less damage.

   B. “LIMITED ENTRY” YELLOW POSTER
      There is structural damage to a portion of the building.
      The building needs utility or weather resistance repairs.
      The building may be occupied safely.
      Generally greater than 10% and less than 50% damage.

   C. “THIS BUILDING IS UNSAFE” RED POSTER
      There is major structural damage.
      No occupancy is allowed.
      May or may not need to be demolished.
      Generally more than 50% damage.

3. If there is immediate danger to life from failure or collapse, the team leader should inspect and, as appropriate sign or have Building Official sign condemnation order or call the appropriate entities to shore-up structure.

NOTE: CHECK ON CODE FOR DEMOLITION OF PROPERTY DURING/AFTER DISASTER
### DISASTER ASSESSMENT AND RECOVERY TEAM (DART)

Emergency Support Function #4 - Fire Fighting and Emergency Medical Services

Primary Agency
Radford City Fire Departments
Emergency Medical Services (Campus and City)

Secondary/Support Agencies
Virginia Department of Forestry
Private Ambulance Services
Virginia Department of Emergency Management
Office of Emergency Preparedness

Introduction

Purpose:
Emergency Support Function (ESF) #4 – Fire Fighting and Emergency Medical Services directs and controls operations regarding fire prevention, fire detection, fire suppression, rescue, and hazardous materials incidents; as well as to assist with warning and alerting, communications, evacuation, and other operations as required during an emergency.

Scope:
ESF #4 manages and coordinates fire-fighting and emergency medical activities including the detection and suppression of fires, treatment and transport of injured victims, and provides personnel, equipment, and supplies to support the agencies involved in the firefighting and emergency medical operations.

Policies:
- Priority is given to public, fire fighter, and emergency medical safety and protecting property (in that order).
- For efficient and effective fire suppression and/or treatment and transport of the injured, mutual aid may be required from various local fire fighting and rescue agencies. This requires the use of the Incident Command System together with compatible equipment and communications.
- Personnel will stay up to date with procedures through education and training.

**Concept of Operations**

**General:**

The City of Radford Fire Department and Carillion Rescue Services are prepared to assume primary operational control in fire prevention strategies, fire suppression, patient management, and hazardous material incidents. (See ESF #10.) Fire department and rescue personnel who are not otherwise engaged in emergency response operations will assist other university agencies in warning and alerting the public, evacuation, and communications as is necessary and appropriate during an emergency situation.

When the Emergency Support Function is activated all requests for fire fighting and emergency medical support will, in most cases, be submitted to the 9-1-1 Center for coordination, validation, and/or action.

The Coordinator of Emergency Preparedness or his/her designee will determine the need to evacuate large areas and will issue orders for evacuation or other protective action as needed. However, the incident commander may order an immediate evacuation prior to requesting or obtaining approval, if in his/her judgment this action is necessary in order to safeguard lives and property. Should an evacuation become necessary the warning and instructions will be communicated through all appropriate means. In addition, Law Enforcement and Residential Life will use mobile loudspeakers or bullhorns, or go door to door to ensure that all affected residents have received the warning.

During an evacuation in which a large number of citizens are sheltered, the local Rescue Agency may coordinate the positioning of an on site EMS basic life support unit to support the shelter operation.

**Organization:**

A fire and ems representative will be assigned to the EOC in order to coordinate the fire and rescue service response. These representatives will be a part of the EOC staff and will assist with the overall direction and control of emergency operations.

The Fire and EMS Departments will implement evacuations and the Police Departments will assist and provide security for the evacuated area. In the event of a hazardous materials incident, the Incident Commander should implement immediate protective actions to include evacuation as appropriate.

The Fire Departments have _11_ paid fire-fighters and approximately _30_ volunteer fire-fighters.

The Emergency Medical Services are contracted through Carillion. Radford University EMS is a student organization with 26 members and will assist as able.

**Actions**

- Develop and maintain plans and procedures to provide fire and rescue services in time of emergency;
• Document expenses and continue for the duration of the emergency;
• Check fire fighting, rescue, and communications equipment;
• Fire and EMS Service representatives should report to the Local Emergency Operations Center to assist with operations;
• Fire and EMS department personnel may be asked to assist with warning and alerting, evacuating, communications, and emergency medical transport; and
• Follow established procedures in responding to fires and hazardous materials incidents and in providing rescue services; and
• Requests mutual aid from neighboring jurisdictions.

Responsibilities

• Fire prevention and suppression;
• Emergency medical treatment;
• Hazardous materials incident response and training;
• Radiological monitoring and decontamination;
• Assist with evacuation;
• Search and rescue;
• Temporary shelter for evacuees at each fire station;
• Assist in initial warning and alerting;
• Provide qualified representative to assist in the Local EOC;
• Requests assistance from supporting agencies when needed;
• Arranges direct liaison with fire chiefs in the area;
• Implements Mutual Aid.
Fires Incident Annex

Primary Agency
Radford City Fire Department
Radford University Police

Cooperating Agencies
Facilities Management
EMS
Safety Office
Residential Life
Office of Emergency Preparedness

Introduction
Purpose:
To protect students, visitors, staff, and faculty in the event of a fire affecting Radford University Campus.

Scope:
A fire can develop through a variety of causes. This annex works to describe some general ways to handle and deal with these various kinds of situations. Fire extinguishers are provided in every building on campus and training is done throughout the year in their use. All residence halls perform fire drills on a monthly basis. Evacuation signs are posted in hallways and areas of refuge are clearly marked by lighted signs.

Procedures:
- If smoke or fire is detected in a building, pull the nearest fire alarm to warn other occupants. If there is not fire alarm, warn all occupants to leave.
- Dial 9-911 or 831-5500 to contact the fire department.
- If the fire is small and can be safely extinguished, fire extinguishers are located throughout all buildings. Fire extinguisher procedures are located in Appendix A.
- Evacuate the building as quickly and calmly as possible.
- Some stairwells serve as areas of refuge if you cannot exit the building or if a disabled person cannot be removed.
- Conduct a headcount of all persons to ensure that no one remains inside.
• The Campus Police will assist in evacuation and security of the building.

• The Emergency Operations Center may be activated.

• No one should re-enter the building until authorized to do so by the fire department or Safety Office.

**Concept of Operations**

**General:**
In order to protect the students, faculty, and staff at Radford University it is necessary to develop and practice evacuation and fire drills. All persons working, attending classes, or living on campus will be made aware of this annex and in the event of a Fire, follow the directions of the police department, Fire Department, Safety Office, and procedures outlined in this Annex.

**Organization:**
The Radford City Fire Chief or, in his absence, the Ranking Officer of the Radford City Fire Department, is responsible for making the decision to re-enter a building after a building fire. The Radford University Police Department will assume direction and control until the fire department arrives.

The Emergency Response Guide provides a checklist of actions to take in the event of a fire. Additional information will be provided as necessary to occupants on campus by all means available at the time.
Fire Extinguisher Procedures

1. Fire extinguishers should only be used by properly trained personnel. If you have the slightest doubt, leave the area and call the fire department.

2. Fight the fire only if:
   - The Fire Department and University Police has been notified.
   - Evacuation has started.
   - The fire is small and confined to its immediate area of origin (wastebasket, sofa, etc.).
   - You have a way out and can fight the fire with your back to an exit.
   - You have the proper extinguisher and have been properly trained.
   - You use careful judgment and get out fast if the fire starts to spread.

3. To operate a fire extinguisher, remember the word **PASS:**
   - **PULL** the pin by grasping the extinguisher neck and removing the pin.
   - **AIM** the nozzle, hose, or horn at the base of the fire.
   - **SQUEEZE** the handle to release the extinguishing agent.
   - **SWEEP** from side to side at the base of the fire until it is out.

4. Call the Safety Office to replace the used fire extinguisher.
Fire Evacuation Procedures

**Non Residential Buildings**

1. If you choose not to fight the fire, quickly shut all file cabinets and drawers, turn off all electrical equipment and shutdown your computer. Exit the building as calmly and quickly as possible using the nearest safe exit. If readily available, grab the AED and first aid kit as you leave (it may be needed in the assembly area). Close all windows and doors on the way out (do not lock doors). **Do not use elevators.** Stay low to the floor if there is a lot of smoke.

2. Go to the assigned assembly area and keep well away from the building. Building Managers will conduct a head count to determine if anyone is missing. Do not reenter the building until authorized by University Police.

3. Facilities Management, Housekeeping, University Police, and Building Managers will assist in the evacuation of the building by directing occupants to the nearest safe exit, ensuring that all personnel have exited, and evacuating disabled persons to the nearest stairwell or exit.

4. The City Fire Department will assume control of the building when they arrive. Give full cooperation to the Fire Department and Police Department.

5. Inform University Police or the Fire Department of missing people and disabled people who were placed in stairwells.

6. All elevators will be recalled to the ground floor when the alarm sounds.

**Residence Halls**

1. Resident Directors, Resident Assistants, and Residence Hall Fire Marshals will assist in the evacuation.

2. Wear a coat and shoes, and take a wet towel to place over your face in case of smoke. Before opening any door, feel the door knob with the back of your hand. Do not open the door if it is hot. Brace yourself behind the door, crouch low, and open the door slightly if it is warm. Stay low if the area is smoky. If heat or heavy smoke is present, close the door and stay in your room.

3. Proceed to the assigned assembly area. RA's and RD's will conduct a head count to see if anyone is missing. Remain outside until the appropriate signal is given to re-enter.
4. If all exits are blocked:

- Go back to your room, close the door and call the University Police to report your location.
- Seal the cracks around the door with tape and wet towels to prevent smoke from entering.
- Open the window a few inches for fresh air and hang a brightly colored cloth or bed sheet out the window to alert the Fire Department of your location. If you have a flashlight use it to signal with at night.
- If smoke gets in your room, keep low and dampen a cloth with water, place it over your nose and breath lightly through it.
- Stay calm. Do not jump from windows above the second floor. Rescue personnel have the proper equipment to get to you quickly.

5. All elevators are recalled to the ground floor when the alarm sounds except those located in the following buildings:

- Muse, B-wing & C-wing
- Madison
- Jefferson
- Washington
- Moffett
- Perry
- Trinkle
- Floyd
- Stuart

**Responsibilities of University Police**

1. Dispatch officers to the building to assist in the evacuation. Ensure that all occupants have left the building.

2. Set up a command post and activate the Emergency Operations Plan if necessary.

3. Control the scene until the Fire Department arrives.

4. Locate the fire if possible and direct the Fire Department to it.

5. Attempt to put out the fire if it is small and does not put police officers at undue risk.

6. Render first aid and move injured persons to safe areas.

7. In resident halls notify the Area Coordinator/Assistant Director, Director, or Associate Director as soon as possible.
8. Prevent unauthorized personnel from entering the building and control traffic.

9. Ensure that all personnel have been evacuated and check stairwells and porches for handicapped students. Check with the University Police Dispatcher for the location of handicapped students in the building.

10. Notify the Fire Department of the location of handicapped students in stairwells.

11. Recall elevators to the ground floor.

**Responsibilities of Resident Director/Assistant**

1. Confirm that the University Police have been called.

2. Notify an Assistant Director/Area Coordinator as soon as possible. The Assistant Director will notify the Director and/or Associate Director.

3. Assist in evacuating residents from the building using the nearest safe exit. **Do not use elevators.** The elevator shaft can fill with smoke very easily and there may be a power outage which could trap people in the elevator.

4. Assist in evacuating handicapped students to stairwells and notify emergency personnel of the location of handicapped individuals if they cannot be removed.

5. Ensure that Fire Marshal(s) and/or staff check each door to awaken sleeping students.

6. Direct the Fire Department to the fire if University Police is not on the scene.

7. When the evacuation has been completed, maintain order, prevent anyone from reentering, and keep all people a safe distance from the building.

8. Account for students who evacuated the building. Head counts should be reported to the Resident Director or person in charge. Residents unaccounted for should be reported to the senior officer at the scene.

9. Submit a report of the fire to the Director of Housing and the Safety Office within 24 hours.

10. Maintain a current list of all disabled students in the building noting the room number and the type of disability. Ensure that a copy of the list is sent to the RU Police Department.

11. In case of a major fire when the building cannot be occupied, the Office of Residential Life will help students make arrangements for relocation.
Responsibilities of Resident Hall Fire Marshals

1. Get the roster and knock on each door in your designated area of responsibility and have residents evacuate immediately.

2. Stay in designated area during the evacuation to assure that procedures are followed in a safe and orderly manner.

3. Take roll at the evacuation point and ask residents who are present to help account for absentees.

4. Stay with the occupants of your floor/wing until time to re-enter the building.

5. Immediately report students not accounted for and any problems to the nearest staff member.
Emergency Medical Services Incident Annex

Primary Agency
Radford University EMS
Carillion Patient Transport Services

Cooperating Agencies
Facilities Management
Radford University Police Department
Safety Office
Residential Life
Office of Emergency Preparedness

Introduction

Purpose:
To protect students, visitors, staff, and faculty in the event of a medical emergency while on the Radford University Campus.

Scope:
Medical Emergencies can develop through a variety of causes. This annex works to describe some general ways to handle and deal with these various kinds of situations. Radford University has an EMS agency that responds to all calls on campus. Transport to a local hospital is provided by Carillion Patient Transport Services

Procedures:

- Dial 9-911 or 831-5500 to contact the EMS department.
- Do not move the victim if you suspect spinal damage or neck trauma.
- In the event of cardiac arrest, AED’s are located in several places on the University. See Tab
- Keep the victim calm until help arrives.
- Do not move seriously injured person unless they are in further danger of injury or death.
- Radford University maintains a Student Health Clinic in Moffet Hall for illness and injury.
- The Emergency Operations Center may be activated depending on the scope and nature of the injury or illness.
**Concept of Operations**

**General:**

In the event of a medical emergency act immediately, keep calm, and reassure the victim. Assist injured personnel and remove them from the hazard if injuries are minor. Do not move seriously injured persons unless they are in danger of further injury. Notify personnel in adjacent areas of potential hazards. Render appropriate first aid to accident victims and summon medical help as soon as possible. Be prepared to give the following information: what happened, number of victims, kind of injury, exact location of the emergency, what help is being given, and your name and phone number. Do not transport seriously injured persons to the hospital and do not hang up until the dispatcher hangs up.

**Organization:**

The Radford University EMS is responsible for responding to and treating sudden illness and injury on the campus. Carillion Patient Transport is responsible for transportation to the local hospital. The Radford University Police Department will assume direction and control until the EMS department arrives.

The Emergency Response Guide provides a checklist of actions to take in the event of a medical emergency.
General Guidelines for Medical Emergencies

Life Threatening Conditions

1. Check the scene for safety. Check the victim for consciousness, breathing, and severe bleeding.

2. Immediately call 9-911 then the University Police (when time allows) if the victim:
   - Is unconscious.
   - Has trouble breathing or is breathing in a strange way.
   - Has chest pain or pressure that lasts longer than 3-5 minutes.
   - Is bleeding severely.
   - Has pressure or pain in the abdomen that does not go away.
   - Is vomiting or passing blood.
   - Has repeated seizures or a seizure that lasts for more than a few minutes.
   - Has a severe headache or slurred speech.
   - Appears to have been poisoned.
   - Has injuries to the head, neck, or back.
   - Has possible broken bones.
   - Has a critical burn.
   - Is having a severe allergic reaction.

3. Do not move the victim unless absolutely necessary. Watch for signs of shock.

4. Provide care if you have the proper training.

5. If it is necessary to use a helicopter to transport a victim to the hospital, the helicopter will land at the Dedmon Center in an area determined by the University Police Department. The hospital EMS squad will transport the victim to the landing site.

Non Life Threatening Conditions

1. If there are no life threatening conditions:
   - Watch for changes in breathing and consciousness.
   - Help the victim rest comfortably.
   - Keep the victim from getting chilled or overheated.
   - Reassure the victim.

2. Call University Police for serious injuries that are not life-threatening. University Police will assess the situation, provide first aid and call EMS if necessary. University Police will not transport the victim to the hospital.
3. Departments are responsible for providing first aid for minor conditions such as cuts and scrapes.

**Outside Agencies**

1. If a student is treated at the Student Health Center or a regional hospital, and the news media and/or law enforcement agencies may be involved, the Director of Health Services will notify the University Police. This notification will consist of the circumstances surrounding the emergency, but not privileged information unless a waiver has been obtained.

2. The University Police will immediately notify the Vice President for Business and Governmental Affairs, Assistant Vice President for Communications, Safety Manager and other appropriate university officials. The Vice President for Student Affairs will contact the student's parents. If appropriate, the Vice President for Business and Governmental Affairs will notify the President.

3. Injuries or illnesses resulting in the in-patient hospitalization of three or more employees must be reported to the Safety Office within 8 hours. The Safety Office will investigate the incident and notify the local OSHA office.
Specific Procedure for Medical Emergencies

Life Threatening Conditions

1. Checking the victim:
   - Check the scene to make sure it is safe to enter.
   - Tap and shout to see if the person responds.
   - If no response, call 9-911.
   - Position victim on back while supporting the head and neck.
   - Tilt head back and lift chin.
   - Look, listen, and feel for breathing for about 10 seconds.
   - If no breathing give 2 breaths. Each breath should last 1 second.
   - Start CPR.

2. If air doesn't go in:
   - Re-tilt person's head.
   - Give 2 more breaths.
   - If air still won't go in give 30 chest compressions on the center of the breastbone.
   - Check the mouth for a foreign object.
   - Remove object and give 2 breaths.
   - If breaths go in, check for breathing and start CPR if necessary.

3. If no breathing start CPR:
   - Find hand position on center of breastbone.
   - Position shoulders over hands keeping arms straight.
   - Compress chest 30 times in about 18 seconds, pressing down about 2 inches.
   - Give 2 breaths.
   - Continue compressions and breaths until an ambulance or AED arrives.

4. If you suspect a conscious victim is choking:
   - Bend the victim forward and give 5 back blows between the shoulder blades.
   - Place fist about 1-2 inches above the naval.
   - Grasp fist with other hand.
   - Give 5 quick inward and upward thrusts.
   - Repeat back blows and abdominal thrusts until object is removed.

Inhalation Exposure

- Check the scene.
• Remove the victim as quickly as possible to fresh air if it can be done safely.
• In most situations rescue personnel should wear proper respiratory equipment and protective clothing.
• Never enter a confined space to attempt a rescue.
• Keep the victim at rest and warm.
• If the patient is unconscious, keep the airway clear.
• Start CPR if breathing has stopped.

Skin Exposure

• Act quickly; corrosive chemicals can damage the skin very rapidly.
• If only a small area of the skin is exposed flood promptly with water and wash gently with soap.
• Go to the nearest emergency shower and flood with large amounts of water for 15 minutes if large areas of the skin are involved.
• Remove clothing while standing in the shower.
• If chemicals are splashed on the head, eye protective equipment should be left on until the chemical has been washed away.
• Do not use chemical neutralizers on the skin.

Eye Exposure

• If a chemical is splashed into the eye go immediately to the nearest eye wash fountain.
• Spread the eyelid open with the fingers and wash the eye for at least 15 minutes.
• Flood all surfaces of the eye and the underside of the eyelids with water.
• If no eye wash station is available, lay the victim on his/her back, turn the head, and pour water into the eye, directing the stream to the side of the head. Ensure that the injured eye is below the good eye.
• Do not attempt to remove foreign objects from the eye, cover the eye with a sterile pad and seek medical care immediately.

Poisoning

• Quickly take the container to the phone and call the Poison Control Center at 1-800-222-1222 and follow their instructions.
• Care for shock and monitor breathing while waiting for emergency help.
• Do not give anything by mouth unless instructed to do so by medical personnel.

External Bleeding

• Put on a pair of disposable nitrile or latex gloves.
• Cover wound with sterile gauze and press firmly against the wound with your hand for several minutes.
• Apply a pressure bandage snugly over the wound.
• If bleeding doesn't stop, apply additional dressings. Do not remove blood soaked bandages.
• Carefully wash small cuts with soap and water, apply an antiseptic and bandage.

Shock

Following a severe injury the victim may go into shock. Shock is life threatening. Signs of shock include restlessness or irritability, an altered state of consciousness, extreme paleness, cold and clammy skin, perspiration on the forehead or hands, weakness, nausea, vomiting, shallow breathing and a weak rapid pulse. Caring for shock involves the following steps:

• Have the victim lie down.
• Control external bleeding.
• Maintain normal body temperature.
• If there are no head or neck injuries elevate the legs about 12 inches.
• Do not give the victim anything to eat or drink.
• Call an ambulance.

Cryogenic Burns

• For short contact, immediately flush the area with large quantities of water.
• For prolonged exposure or if visible tissue damage is apparent seek medical help immediately to restore tissue to normal temperature.

Fractures

• Do not move the patient unless it is necessary to prevent further injury.
• Splint the body part if the patient must be moved and you can do it without causing more pain.
• Check for proper circulation before and after splinting.
• Treat for bleeding and shock.

Strains and Sprains

• Have the victim lie down.
• Place a clean cloth over the injured area.
• Apply ice to the injured area (20 minutes on, 20 minutes off for 1-2 hours).
• Elevate the injured area.

Electrical

• Disconnect the power and cautiously remove the current source with an insulator such as a dry stick or board.
• Do not use metal or anything that is wet.
• Do not touch the victim until he/she has been removed from the electrical circuit.
• Apply water to the burn until the pain subsides.
• Check for breathing and start CPR if necessary.

**Clothing Fire**

• Proceed to a safety shower if immediately available.
• If not, fall to the floor and roll to smother the flames.
• Fire blankets should only be used as a last resort, because they may hold heat in and increase the severity of burns.
• Fire extinguishers should not be used on the skin because they can freeze the skin or increase the likelihood of infections.
• Do not remove clothing that adheres to burnt skin.

**Thermal Burns**

• Cool the burned area with large amounts of cool water.
• Cover the burn with a dry, clean dressing.
• Do not use ointments on a severe burn.
• Don't apply ice to a burn unless it is very minor.
• Watch for signs of shock.
• Call an ambulance if there is breathing difficulty, burns covering more than one body part, burns to the head, neck, hands, feet, or genitals, burns resulting from chemicals, explosion, or electricity.

**Sudden Illnesses**

• Care for life threatening conditions first.
• Help the victim rest comfortably.
• Keep the victim from getting chilled or overheated.
• Reassure the victim and stay calm.
• Watch for changes in consciousness and breathing.
• Do not give anything to eat or drink unless the victim is fully conscious.
• Place on side if the victim vomits.
• Position victim on back and elevate legs if no head or spine injury is suspected.

**Seizure**

• Do not hold or restrain the victim or place anything between the teeth.
• Remove any objects that may cause injury.
• Cushion the victim's head.
• Call an ambulance if seizure lasts more than a few minutes or victim has multiple seizures.

**Diabetic Emergency**

• Give the victim some kind of real sugar.
• Call an ambulance if victim doesn't get better in about 5 minutes.

Heat Related Illness

• Get the victim out of the heat.
• Loosen tight clothing.
• Remove perspiration soaked clothing.
• Apply cool, wet cloths to the skin.
• Fan the victim.
• If victim is conscious give cool water to drink.
• Call for an ambulance if the victim refuses water, vomits, or starts to lose consciousness.

Hypothermia

• Call an ambulance.
• Care for life threatening conditions.
• Move the victim to a warm place.
• Remove any wet clothing and dry the victim.
• Warm the victim slowly by wrapping in blankets or putting on dry clothes.
• Apply other sources of heat if they are available.
INFECTIONOUS DISEASES

Students

1. Students should report to Student Health Services to assess the severity of the disease.

2. If the disease is potentially life threatening and presents an immediate risk to others, Student Health will isolate the student and contact the Emergency Room at the Carilion New River Valley Medical Center.

3. Student Health Services will call an ambulance for transportation to the hospital.

4. Student Health Services will notify the University Police Chief. The Police Chief will notify the Vice President for Business and Governmental Affairs, Assistant Vice President for Communications, Safety Manager and other appropriate university officials. The Vice President for Business and Governmental Affairs will notify the President, if appropriate.

5. Student Health Services will call the hospital for updates and inform the Police Chief. The Police Chief will keep appropriate university officials informed.

6. The Emergency Room at the hospital will call the local Health Department, if appropriate.

7. To report a student with a potentially infectious disease that could impact university operations, the hospital should contact the University Police. The Police Chief will contact other appropriate university officials and set up the EOC, if necessary.

8. The Health Department, Student Health Services, and University Police will attempt to find individuals who may have come in contact with the victim.

9. The Health Department and Student Health Services will make arrangements to give prophylaxis to those who may have come in contact with the victim at the university.

10. Contacts will be trained or given handouts describing signs and symptoms of the disease and told to contact Student Health Services if they have any of these symptoms. Training and handouts will be given by the Health Department, Student Health Services or the Safety Manager.

11. The Safety Office in consultation with Student Health Services and the Department of Health will determine appropriate decontamination procedures for the room and personal belongings.
12. If the student lived in the Residence Halls, the Police Department will quarantine the room. The quarantine will be released upon orders of the Police Chief in consultation with the Safety Manager.

Non-Students

1. Employees and visitors should call an ambulance for transportation to the Carilion New River Valley Medical Center.

2. Report the incident to the University Police. University Police will notify the Vice President for Business and Governmental Affairs, Assistant Vice President for Communications, and the Safety Manager. If appropriate, the Vice President for Business and Governmental Affairs will notify the President.

3. The Emergency Room at the hospital will call the local Health Department, if required. To report an employee or visitor with a potentially infectious disease that could impact university operations, the hospital should contact the University Police. The Police Chief will contact other appropriate university officials and set up the EOC, if necessary.

4. University Police will call the hospital for updates and keep appropriate university officials informed.

5. The Safety Office in consultation with the Department of Health will determine appropriate decontamination procedures.

6. The Health Department and University Police will attempt to find individuals who may have come in contact with the victim.

7. The Health Department and Student Health Services will make arrangements to give prophylaxis to those who may have come in contact with the victim at the university.

8. Contacts will be trained or given handouts describing signs and symptoms of the disease and told to contact Student Health Services or their local Physician if they have any of these symptoms. Training and handouts will be given by the Health Department, Student Health Services or the Safety Manager.
Emergency Support Function #5 – Emergency Management

Primary Agency
Radford University Office of Emergency Preparedness
Radford City Emergency Management

Secondary/Support Agencies
Fire
Police
Department of Information and Technology
Facilities Management
Safety Office
Red Cross
City Attorney
City Manager
Finance
Logistics
Virginia Department of Emergency Management

Introduction

Purpose:
Emergency Support Function (ESF) #5 - Emergency Management directs, controls, and coordinates emergency operations from the University’s Emergency Operation Center utilizing an incident command system. ESF #5 must ensure the implementation of actions as called for in this plan, coordinate emergency information to the public through ESF #2, and coordinate with the Radford City Emergency Operation Center should outside assistance be required.

Scope:
ESF #5 serves as the support for all university departments across the spectrum of incident management from prevention to response and recovery. ESF #5 facilitates information flow in the pre-incident prevention phase in order to place assets on alert or to pre-position assets for quick response. During the post-incident response phase, ESF #5 activities include those functions that are critical to support and facilitate multi-agency planning and coordination. This includes alert and notification, deployment and staffing of emergency response teams, incident action planning, coordination of operations, logistics and material, direction and control, information management, facilitation of requests for assistance, resource acquisition and management (to include allocation and tracking), worker safety and health, facilities management, financial management, and other support as required.
Policies:

- Emergency Support Function #5 provides an overall university wide multi-agency command system implemented to manage operations during a disaster.
- The Incident Command System can be used in any size or type of disaster to control response personnel, facilities, and equipment.
- The Incident Command System principles include use of common terminology, modular organization, integrated communications, unified command structure, coordinated action planning, manageable span of control, pre-designated facilities, and comprehensive resource management.
- ESF #5 staff supports the implementation of mutual aid agreements to ensure seamless resource response.
- Provides representatives to staff key positions on Emergency Response Teams.
- Departments and agencies participate in the incident action planning process, which is coordinated by ESF #5.

Concept of Operations

General:

The Coordinator of Emergency Preparedness will assist in the development and maintenance of SOPs on the part of each major emergency support service. Generally, each service should maintain current notification rosters, designate and staff an official emergency operations center, designate an EOC representative, establish procedures for reporting appropriate emergency information, and provide ongoing training to maintain emergency response capabilities. Emergency Preparedness officials and departments assigned responsibilities by this plan should be aware of the hazards that have the greatest potential for a local disaster and are most likely to occur.

When an emergency threatens, available time will be used to implement increased readiness measures. The Coordinator of Emergency Preparedness will assure that all actions are completed as scheduled.

The EOC support staff will include a recorder, message clerk, and other support personnel as required in order to relieve the decision-making group of handling messages, maintaining logs, placing maps, etc. Procedures for these support operations should be established and maintained. An EOC wall map should be prepared and be readily accessible.

The Planning Section, when activated, will produce situation reports which will be distributed to the EOC staff, on-scene incident command staff, and the VEOC. The staff of the EOC will support short term and long term planning activities. Plans will be short and concise. The EOC staff will record the activities planned and track their progress. The response priorities for the next operational period will be addressed in the Incident Action Plan (IAP).
Organization:

Emergency operations will be directed and controlled from the Emergency Operations Center (EOC). The EOC staff will consist of the Director and Coordinator of Emergency Preparedness, Chief of Police, Director of Facilities Management, Director of Construction and Planning, Dean of Students, University Relations, Division of Information Technology, and key department heads or their designated representatives. The succession of authority within these key departments should be available in the EOP or Continuity of Operations Plan (COOP). The list should include information on both elected and designated positions; other positions may be outlined in state or local statues. EOC support personnel to assist with communications, internal logistics, finance, external affairs and administration will also be designated. The Director of Emergency Preparedness will be available for decision-making as required. The Director of Emergency Preparedness is also responsible for coordinating the development and implementation of hazard mitigation plans. The chiefs of regulatory agencies or designees are responsible for enforcing compliance with rules, codes, regulations, and ordinances.

The Incident Commander will utilize the Incident Command System. Depending on the nature and scope of the incident it may be handled solely by the Incident Commander, or it may require coordination with the Emergency Operations Center. In major disasters there may be more than one incident command post. The Incident Commander will generally be the Coordinator of Emergency Preparedness, Director of Emergency Preparedness, or a representative from the Primary Agency.

The regulatory agencies and governing bodies play an important role as they must pass and implement the rules, regulations, codes, and ordinances, which would reduce the impact of a disaster. Local government agencies and volunteer emergency response organizations assigned disaster response duties are responsible for maintaining plans and procedures. These agencies are also responsible for ensuring that they are capable of performing these duties in the time of an emergency. In addition, these agencies are responsible for bringing any areas where new/revised codes, regulations, and ordinances may mitigate a particular hazard to the attention of the University President and the Cabinet, in coordination with the Coordinator for Emergency Preparedness.

The Coordinator of Emergency Preparedness will assist in the development and maintenance of established procedures on the part of each major emergency support function. Generally, each department should maintain current notification rosters, designate staffing as appropriate for an official agency operation center, if applicable, designate EOC representatives, establish procedures for reporting appropriate emergency information, and provide ongoing training to maintain emergency response capabilities.

The Coordinator of Emergency Preparedness will assure that all actions are completed as scheduled. The President may close facilities, programs, and activities in order that employees who are not designated “emergency service personnel” are not unnecessarily placed in harms way.

The Coordinator of Emergency Preparedness will coordinate training for this emergency support function and conduct exercises involving the EOC.
Actions

- Develop and maintain a capability for emergency operations and reflect it in the Emergency Operations Plan.
  
a. Make individual assignments of duties and responsibilities to staff the EOC and implement emergency operations;
b. Maintain a notification roster of EOC personnel and their alternates;
c. Establish a system and procedure for notifying EOC personnel;
d. Identify adequate facilities and resources to conduct emergency operations at the EOC;
e. Coordinate Emergency Management mutual aid agreements dealing with adjunct jurisdictions and relief organizations, such as the American Red Cross;
f. Develop plans and procedures for providing timely information and guidance to the campus in times of emergency through ESF #2;
g. Identify and maintain a list of essential services and facilities, which must continue to operate and may need to be protected;
h. Test and exercise plans and procedures; and
i. Conduct campus outreach/mitigation programs.

- Ensure compatibility between this plan and the emergency plans and procedures of the City of Radford;
- Develop accounting and record keeping procedures for expenses incurred during an emergency;
- Define and encourage hazard mitigation activities, which will reduce the probability of the occurrence of disaster and/or reduce its effects
- Provide periodic staff briefings as required;
- Prepare to provide emergency information to the public in coordination with ESF #2;
- Provide logistical support to on scene emergency response personnel;
- Maintain essential emergency communications through the established communications network;
- Provide reports and requests for assistance to the Virginia EOC;
- Compile an initial damage assessment report and send to the Virginia EOC; and
- Coordinate requests for non-mutual aid assistance.

Responsibilities

- Activates and convenes local emergency assets and capabilities;
- Coordinates with law enforcement and emergency management organizations;
- Coordinates short and long term planning activities;
- Maintains continuity of government;
- Directs and controls emergency operations;
- Submits state required reports and records;
- Conducts initial warning and alerting; and
- Provides emergency public information.
Radford University Emergency Levels: Defined

The following information for Radford University Emergency Levels 1, 2, and 3 under the RU Emergency Operations Plan is intended as a general guideline to responding to Radford University campus emergencies and events. It is not intended to represent all possible campus event scenarios that may take place on or adjacent to the RU campus.

**Emergency Event Level 1**

A ER Level 1 event is normally a minor or isolated event that can be responded to or quickly resolved by campus police, regional law enforcement, and or fire department using internal resources or limited external assistance.

A Level 1 event will not, in most instances, impact life, campus property, or the health and safety of the RU campus community. Although a level 1 event may require response from the RU Police Department, Radford Fire Department, RU Facilities, Emergency Coordinator, Emergency Management Team, or other campus departments it will normally have little or no impact on normal operations on the RU campus and will not require activation of the RU Emergency Operations Plan or RU Emergency Response Team.

A Level 1 event will not normally require activation of any campus wide early alert notification telecommunications and/or campus siren systems. Administrative and department notifications may be activated to notify the administrative and operations groups including the President, Cabinet, Facilities, and ER Management personnel through the campus police department communications center.

Examples of Level One events include but are not limited to: Localized building fire or fire alarm activation, chemical spill, electrical or plumbing failure, a water main break involving a building or one which threatens critical services, a construction incident, an odor or smoke requiring a building evacuation, loss of heat or power to a building. Actual or perceived threats or problems isolated to a small area or building, a suicide, domestic threats or violence that are controlled within a confined zone or area and are a short in duration.

**NOTE:** Not all scenarios can be listed and or addressed. The RU Police Chief, Health Services, Emergency Coordinator, or President or designated administrator may determine the need to move from an Event Level 1 to another level if the event escalates.
**Event Level 2** are events or emergencies that have or may have the potential to affect all or part of the RU campus and may require assistance from off campus agencies such as fire department, police, city, state, or federal departments.

*Level 2 events* usually will dictate activation of the Radford University Emergency Operations Center (EOC) and assigned EOC team members recalled and convened to coordinate campus responders including communications with required external emergency support services. The President, cabinet and identified senior administration and personnel will receive alert notification through multiple communications channels and kept apprised of the event through the EOC and Emergency Coordinator.

**Examples** of a Level 2 include but are not limited to: building fires that may impact or become a threat to other facilities or have structural damage, major chemical spills, rail accidents adjacent to the university, long utilities outages, water main breakage, and river flooding near Dedmon Center. Additional scenarios include evaluation of buildings due to fire, threats, or civil unrest, terrorism, or acts of violence on or near the campus including severe weather or regional emergencies that may impact operations or threaten RU students and personnel.

**Note:** The President, Police Chief, Health Services, Emergency Coordinator, Director or designated administrator may determine the need to move from an Event Level 2 to a Level 3 other level if the event warrants.

**Event Level 3** may be classified as a campus, regional, state, or national emergency that affects the campus and surrounding community and has the capacity to threaten or adversely affect life, health, and or property on or near the Radford University Campus.

In all instances of a *Level 3 event* the Emergency Operations Center will be activated and the EOC Team personnel recalled. The EOC command post will be manned and all administrative emergency contact channels notified. Both long term interruption of normal operations and implementation of a recovery phase are expected.

In most instances a Level 3 emergency will require assistance with multiple agencies including establishment of a cooperative communications model for RU operations responders, administrators, and emergency support agencies. Scenarios may also include physical injury or death, criminal assault, including potential threats to multiple persons, hostage situations, or violent protests on campus. Extreme weather conditions or pending weather related conditions may cause a level 3 event call or move from lower level to level 3.

National emergencies or Homeland Security related disasters or events that impact or affect significant portions of the region, state. In some instances campus efforts and responses may be dictated by regional, state, and federal authorities requiring coordination between RU and outside agencies.
Examples for a Level 3 event are instances that pose a significant hazard or threat to life, health, and property usually involving multiple agency and multiple RU departments including a major campus evaluation and/or implementation of the relocation plan of students, faculty, administration and staff.

In the event of a Homeland Security, pandemic, weather, or other Emergency Response (ER) event that may disrupt normal academic operations and result in long term campus closing, the EOC and recovery plan will be maintained as necessary to support the operations and safety of RU students and personnel. Radford University will continue to keep communication and instructional options available to RU faculty, students, and staff and provide collaborative communication links with RU planning teams and city, regional educational institutions, state, and national Emergency Response efforts.

Joint EOC Protocols and Liaisons

**Radford City Event**

For disaster events that affect the entire City of Radford including Radford University the primary Emergency Operations Center (EOC) will be the City of Radford. Radford University will send appropriate personnel, as requested by the city, to the Radford City EOC.

The Radford University EOC will be activated and coordinate actions with the City EOC. A Joint Information Center will be set up to coordinate all communications with the media.

**Radford University Event**

For disaster events that affect the university but have a limited impact to the city, the Radford University EOC will be the primary. City personnel will report to university EOC as requested to assist with response and recovery actions.

The city EOC may activate to assist with resource coordination. A Joint Information Center may be activated to coordinate public information.

Emergency Support Function #6 – Mass Care, Housing, Human Resources

Primary Agency
Dean of Students
Residential Life
Department of Social Services

Secondary/Support Agencies
Office of Emergency Preparedness
Radford University Police
Disability Resource Office
Red Cross
Public Schools
Emergency Management
Virginia Voluntary Organizations Active in Disaster (VVOAD)
Virginia Department of Health – Local Health Department
Virginia Department of Mental Health, Mental Retardation and Substance Abuse Services, Mount Rogers Community Services Board
Southwest Medical Reserve Corps

Introduction

Purpose:
Emergency Support Function (ESF) #6 receives and cares for persons who have been evacuated, either from a high-risk area in anticipation of an emergency or in response to an actual emergency.

Scope:
ESF #6 promotes the delivery of services and the implementation of programs to assist individuals, households, and families impacted by an incident. This includes economic assistance and other services for individuals. ESF #6 includes three primary functions: Mass Care, Housing, and Human Services.

- **Mass Care** involves the coordination of non medical mass care services to include sheltering of victims, organizing feeding operations, providing emergency first aid at designated sites, collecting and providing information on victims to family members, and coordinating bulk distribution of emergency relief items.
- **Housing** involves the provision of assistance for short- and long-term housing needs of victims.
- **Human Services** include providing victim related recovery efforts such as counseling, identifying support for persons with special needs, expediting processing of new benefits claims, assisting in collecting crime victim
compensation for acts of terrorism, and expediting mail services in affected areas.

Policies:

Potential hazards may require an evacuation. The actual situation will determine the scope of the evacuation and the number of evacuees who will utilize a shelter.

The Coordinator for Emergency Preparedness and/or Residential Life will determine if a shelter is to be opened and will also select the shelter site(s) in coordination with the primary response agency and the agency that is the provider of the site.

All government/volunteer/private sector resources will be utilized as necessary.

As needed, sheltering, feeding and emergency first aid activities will begin immediately after the incident. Staging of facilities may occur before the incident when the incident is anticipated.

Information about persons identified on shelter lists, casualty lists, hospital admission, etc., will be made available to family members to the extent allowable under confidentiality regulations.

Efforts will be made to coordinate among agencies providing information to minimize the number of inquiry points for families.

Concept of Operations

General:

In the event of a small-scale incident, a temporary place of refuge may be provided at the nearest facility, which could include university buildings, public schools, fire or EMS stations. Local motels and local churches may also be used to house affected persons.

In the event of a large-scale evacuation/displacement of residents, or when the Coordinator along with the Incident Commander decides that a larger facility is required, he will advise Radford City Emergency Coordinator who may call the Superintendent of Schools and the Department of Social Services. The Superintendent of Schools will then activate one or more of the schools in the city as shelter center(s) and will designate a manager to be responsible for operations at the facility. The Department of Social Services will be responsible for registration and record keeping. The American Red Cross will assist with operations at each facility.

Evacuees will be advised to bring the following items with them if time and circumstances permit: one change of clothing, medicines, and sleeping bags or blankets.

Upon arrival, registration forms will be completed for each person. Records will be maintained on the whereabouts of all evacuees throughout emergency operations. The American Red Cross and the Salvation Army may provide food and clothing, and assist in shelter operations in accordance with Statement of Understanding with the Commonwealth of Virginia.
The Department of Social Services will assure that handicapped and other special needs populations are provided for in the time of an emergency. A current roster and a resources list should be maintained. Public information materials should be modified for these populations so that they will be aware of the primary hazards and of mitigation and response actions to be taken.

Should crisis-counseling services be required, trained mental health professionals will be provided by local Community Services Boards, in conjunction with the Department of Mental Health, Mental Retardation and Substance Abuses Services (DMHMRSAS), and Radford University Counseling Services.

Daily situation reports should be provided to the Local Emergency Operations Center (EOC) about the status of evacuees and of operations at the shelter center(s). The Local EOC will then relay information to the Virginia EOC. Adequate records must be maintained for all costs incurred in order to be eligible for post-disaster assistance.

**Organization:**

The Superintendent of Schools, assisted by the Department of Social Services and the American Red Cross, is responsible for the reception and care of evacuees. Public school employees will be assigned support tasks. Local law enforcement or a private security company will provide security. The local health department along with EMS and the Medical Reserve Core will provide first aid and limited medical care service at the shelter center.

**Actions**

- Identify shelter facilities and implement MOA and other agreements;
- Develop plans and procedures to transport, receive, and care for an indeterminate number of evacuees;
- Determine the maximum capacities for each potential shelter;
- Designate managers and other key staff personnel;
- Develop plans and procedures to receive and care for persons with disabilities evacuated from residential dorms;
- Develop plans and procedures to receive and care for the animals of the evacuees;
- Provide mass transportation as required;
- Provide mass feeding as required; and
- Document expenses.

ESF #6-3
Responsibilities

- Activates support agencies.
- Coordinates logistical and fiscal activities for ESF #5.
- Plans and supports meetings with secondary agencies, and ensures all agencies are informed and involved.
- Coordinates and integrates overall efforts.
- Provides registration and record keeping.
- Provides crisis-counseling services as required.
- Provides emergency welfare for displaced persons.
- Coordinates release of information for notification of relatives.
- Provides assistance for special needs population.
- Assists in provisional medical supplies and services.
- Provides available resources such as cots and ready to eat meals.
This "Disaster Shelter Registration" form (#5972) is the standard form used by all American Red Cross Shelter Centers. It is a four-part form with the back copy made of card stock. Copies are distributed within the Shelter Center for various functions such as family assistance and outside inquiry. This form should be kept on hand locally in ready-to-go Shelter Manager Kits. It is available from the American Red Cross National Office through local chapters. They recommend keeping 150 forms for every 100 expected evacuees.
A listing of special needs persons is maintained by the Residential Life. Whenever the Emergency Operations Center (EOC) is in operation, this listing will be on hand with the Residential Life's representative.

It will be the responsibility of Residential Life to prepare, maintain, and exercise an evacuation plan that is specific to the residence halls and to keep current rosters of residents that can be faxed or sent to the EOC during a disaster situation. The Disability Resource Office will also ensure that all special needs populations have been accounted for. These plans will be on file with the Coordinator of Emergency Preparedness and serve as appendices to this ESF.

Emergency Support Function #7 - Resource Support

Primary Agency
Facilities Management Warehouse
Facilities Management Storeroom
University Services

Secondary/Support Agencies
Budget and Financial Manager
American Red Cross
Office of Emergency Preparedness
Facilities Management
Department of Social Services
Virginia Department of Emergency Management
Radford University Materials Management and Procurement

Introduction

Purpose:
Emergency Support Function #7 will identify, procure, inventory, and distribute critical resources, in coordination with other local and state governments, the federal government, private industry, and volunteer organizations, to effectively respond to and recover from the effects of a disaster. ESF #7 functions with the Logistics Support Annex.

Scope:
ESF #7 provides support for requirements not specifically identified in other ESFs. Resource support may continue until the disposition of excess and surplus property is completed. The university will determine what resources are needed and then ESF #7 will collect and distribute those goods by means of a distribution center. Goods that may be needed could include, ice, water, tarps, blankets, clothes, and non-perishable foods.

Policies:
- The initial emergency response will be dependent upon local public and private resources;
- Adequate university resources do not exist to cope with a catastrophic incident;
- Identified public and private sector resources will be available when needed for emergency response;
- Necessary personnel and supplies will be available to support emergency resource response;
- If local resources are depleted, assistance may be requested through the Virginia Emergency Operations Center (EOC);
• University departments and agencies will use their own resources and equipment during incidents and will have control over the management of the resources as needed to respond to the situation;
• The Coordinator of Emergency Preparedness will initiate the commitment of resources from outside government with operational control being exercised by the on-site commander of the service requiring that resource; and
• All resource expenditures will be reported to the VP of Finance and Administration

Concept of Operations

General:
The Warehouse will identify sites and facilities that will be used to receive, process, and distribute equipment, supplies, and other properties that will be sent to the disaster area. University Relations will coordinate all food items received or required for the immediate disaster. The necessary equipment, staff, communications, and security support to these facilities and sites will be provided by local, state, federal governments, volunteer organizations, and private security as required. This process must be closely coordinated with state and federal emergency management officials, local governments in the region, and the media.

The Warehouse and/or University Relations will be responsible for securing and providing the necessary resource material and expertise in their respective areas, through public as well as private means, to efficiently and effectively perform their duties in the event of an emergency. Resource lists will be developed and maintained that detail the type, location, contact arrangements, and acquisition procedures of the resources identified as being critical. Mutual aid agreements will be developed and maintained with adjacent jurisdictions, private industry, quasi-public groups, and volunteer groups, as appropriate, to facilitate the acquisition of emergency resources and assistance.

The Director and Coordinator of Emergency Management, in coordination with the Director of Materials Management and Vice President of Finance and Administration, will assist university departments in the procurement of the necessary resources, to include the contracting of specialized services and the hiring of additional personnel, to effectively respond to and recover from the emergency at hand. Records of all expenditures relating to the emergency/disaster will be maintained in a separate budget code assigned by the Budget and Financial Manager.

Potential sites for local and regional resource distribution centers will be identified, if necessary, and strategically located to facilitate recovery efforts. Priorities will be set regarding the allocation and use of available resources.

Organization:
All departments will be responsible for identifying essential resources in their functional area to successfully carry out their mission of mitigating against, responding to, and
recovering from the devastating effects of disasters that could occur within campus. All departments will coordinate their resource needs with the VP of Finance and Administration and Director of Materials Management.

The Director Residential Life or his/her designee, assisted by public relief organizations, will be in charge of coordinating the relief effort to meet the immediate needs of the student population in terms of food, water, housing, medical, and clothing. (See ESF #6 and #11)

Actions

- Identify essential resources to carry out mission in each functional area and to support operation of critical facilities during the disaster;
- Designate university department(s) responsible for resource management;
- Develop contingency plans to provide emergency lighting, procure and distribute emergency water and provide sewage disposal, if necessary;
- Identify personnel requirements and training needs to effectively carry out mission;
- Develop resource lists that detail type, location, contact arrangements, and acquisition procedures for critical resources;
- Prepare mutual aid agreements with surrounding jurisdictions to augment local resources;
- Review compatibility of equipment of local departments and surrounding jurisdictions and identify specialized training or knowledge required to operate equipment;
- Develop SOPS to manage the processing, use, inspection, and return of resources coming into area;
- Identify actual or potential facilities and ensure they are ready and available to receive, store, and distribute resources (government, private, donated);
- Develop training/exercises to test plan, and to ensure maximum use of available resources;
- Coordinate and develop prescript announcements with Public Information Office regarding potential resource issues and instructions (e.g., types of resources required, status of critical resource reserves, recommended contingency actions, etc.); and
- Contract with federal and state agencies, as well as private industry for additional resources, equipment, and personnel, if necessary.

Responsibilities

- Locates, procures, and issues resources to other agencies to support the emergency response or to promote public safety.
- Locates and coordinates the use of available space for incident management activities.
- Coordinates and determines the availability and provision of consumable supplies.
RESOURCES STORAGE AND RECEIVING

Facilities Management has both a warehouse and storage facility located in the Armstrong Building. A secondary site is located in the Old Burlington Building.

The warehouse will receive all donated or requested resource during emergency events. The location is at 501 Stockton Street.

Donated items that require refrigeration will be coordinated with University Services to use available space in the freezers located in Dalton Hall.

Emergency Support Function #8 – Public Health and Medical Services

Primary Agency
Radford University Student Health Services
Health Department

Secondary/Support Agencies
Department of Social Services
Department of Environmental Services
Water /WasteWater Director
Community Services Board
Fire and EMS Departments
Radford University and Radford City Police
Hospital Systems
American Red Cross
Virginia Department of Environmental Quality
Virginia Department of Health
Virginia Department of Agriculture and Consumer Services

Introduction

Purpose:
Emergency Support Function (ESF) #8 – Health and Medical provides for coordinated medical, public health, mental health, and emergency medical services to save lives in the time of an emergency. These health and medical needs are to include veterinary and/or animal health issues when appropriate.

Scope:
ESF #8 meets public health and medical needs of victims affected by an incident. This support is categorized in the following way:

- Assessment of public health/medical needs;
- Public health surveillance;
- Medical care personnel and medical equipment and supplies; and
- Detect mental health issues and prevent harmful stress levels in the general public.

Policies:
- The Health Department coordinates all ESF #8 response actions using its own internal policies and procedures;
- Each ESF #8 organization is responsible for managing its respective response assets after receiving coordinating instructions;
• The Joint Information Center (JIC see Basic Plan pg 26) is authorized to release general medical and public health response information to the public after consultation with the Health Department.
• If Joint Information Center (JIC) is not employed, the Public Information Officer for the Health Department is authorized to release general medical and public health response information to the public after consultation with the Health Department.
• The Health Department determines the appropriateness of all requests for public health and medical information; and
• The Health Department is responsible for consulting with and organizing public health and subject matter experts as needed.

Concept of Operations

General:

During a threatened or actual emergency, the Director of Student Health or his/her designated representative will direct coordinated health, medical, and rescue services from the Emergency Operations Center (EOC). Coordination will be effected with adjacent jurisdictions as required.

Should a disaster substantially overwhelm local medical and rescue resources, support and assistance will be requested from medical institutions and emergency medical service (EMS) providers in neighboring jurisdictions. The crisis augmentation of trained health and medical volunteers may also be appropriate. Essential public health services, such as food and water inspections, will be provided by the Health Department as augmented by state-level resources and manpower. Public health advisories will be issued only after coordination with the EOC.

During an evacuation in which a large number of evacuees are sheltered in the shelter center, local EMS providers and/or the local Health Department will set up and staff an emergency medical aid station in the shelter center. The Police and or Sheriff's Department will provide security and the Health Department will monitor food safety and shelter sanitation and provide disease surveillance and ‘contact’ investigations if warranted. The Community Services Board will provide mental health services.

In disasters involving a large number of casualties, the Office of the Chief Medical Examiner (OCME) may request assistance from local funeral directors. The OCME must identify the deceased before they are released to funeral homes. A large building may need to be designated to serve as a temporary morgue. The Virginia Funeral Directors Association will provide equipment, supplies, and manpower as needed for such a localized disaster (See Tab 4).

Organization:

A rescue/emergency medical service representative will be assigned, as determined by the Director of Emergency Management or his/her designee, to the Emergency Operations Center (EOC) in order to coordinate the rescue squad response. The rescue squad representative will be a part of the EOC staff and will assist with the overall
direction and control of emergency operations. All of the emergency medical service vehicles are dispatched through their squad station or through the City Communications Center.

The locality is also served by Medflight and Lifeguard MEDEVAC services operating out of Roanoke Hospital (See Tabs 1 and 3).

Because of their speed, vertical flight, and minimal landing requirements, MEDEVAC helicopters are able to respond quickly to emergency situations and provide rapid evacuation of seriously injured and, in some cases, critically ill patients to specialty care centers (e.g., trauma centers). Each MEDEVAC helicopter consists of a specialty pilot and crew in addition to the latest life support and communications equipment.

There are 2 EMS providers serving the university, which will provide emergency medical transportation. Local funeral homes will assist the Health Department and the Chief Medical Examiner's Office in disasters involving mass casualties.

The following organizations provide emergency health services to the university:

Health Department: New River Valley Health District
Emergency Medical Services Providers (EMS)  RUEMS (First Responder non transport), Carillion Ambulance, Lifeline Ambulance Services
Radford University Student Health Services
Hospital: New River Valley Medical Center

Actions

- Designate an individual to coordinate medical, health, and rescue services;
- Develop and maintain procedures for providing a coordinated response;
- Maintain a roster of key officials in each medical support area.
- Establish a working relationship and review emergency roles with the local hospital and emergency medical services providers;
- Activate the agency emergency response plan;
- Implement mutual aid agreements as necessary;
- The Student Health representative will report to the Emergency Operations Center;
- Coordinate medical, public health, and mental health services;
- Provide laboratory services to support emergency public health protection measures;
- Obtain crisis augmentation of health/medical personnel (e.g., physicians, nurse practitioners, laboratory technicians, pharmacists, and other trained volunteers) and supplies as needed;
• Maintain records and monitor the status of persons injured during the emergency;
• Assist the Office of Chief Medical Examiner's in the identification and disposition of the deceased;
• Consolidate and submit a record of disaster-related expenses incurred by Health Department personnel; and
• Assist with the damage assessment of water and sewage facilities, as required.

Responsibilities

• Provide personnel, equipment, supplies and other resources necessary to coordinate plans and programs for public health activities during an incident;
• Inspect and advise on general food handling and sanitation matters;
• Establish communications with ESF # 5 to report and receive assessments and status information;
• Coordinate through the Public Information Officer dissemination of disaster related public health information to the public;
• Provide preventive health services;
• Coordinate with hospitals and other health providers on response to health needs;
• Provide investigation, surveillance, and take measures for containments of harmful health effects;
• Provide coordination of laboratory services;
• Coordinate with hospital medical control on patient care issues and operations;
• Coordinate transportation of the sick and injured with area hospitals or receiving facilities and other EMS agencies;
• Coordinate behavioral health activities among response agencies;
• Assess behavioral health needs following an incident, considering both the immediate and cumulative stress resulting from the incident.
• Coordinate through the Public Information Officer the dissemination of public education on critical incident stress and stress management techniques;
• Provide outreach to serve identified behavioral health needs;
• Coordinate with ESF # 6 to identify shelter occupants that may require assistance;
• Provide water control assistance;
• Local/Regional hospitals will provide medical care for those injured or ill;
• Assist in expanding medical and mortuary services to other facilities, if required; and
• Identify deceased with assistance from local law enforcement and Virginia State Police.

Mission:

To develop an efficient and effective management response system in mass fatality disaster situations to facilitate the preparation, processing, and release of deceased human remains to the next of kin or family representative.

Concept of Operations:

In the event of a mass fatality disaster situation, the State EOC will contact the Office of the Chief Medical Examiner (OCME), who will notify the Virginia Funeral Directors Association (VFDA). Once contacted by the OCME, the VFDA will activate the Mortuary Response Plan and response teams. The VFDA Response Teams will operate under the direction of the District Medical Examiner of the district in which the incident occurred.

In order to ensure a prompt and professional response, the Virginia Funeral Directors Association maintains a resource manual of needed supplies, equipment, and vehicles. If additional resources are necessary to effectively respond to a disaster, the VFDA Executive Director has emergency purchasing authority up to a specified limit. The VFDA also has a specially equipped disaster trailer to assist the State Medical Examiner's Office and other funeral directors in the state with disaster field response.

Organization:

The Virginia Funeral Directors Association (VFDA) is responsible for the statewide coordination of the mortuary activities in the state. Each district has a response team comprised of members who have completed training in the VFDA-approved program that qualifies them as certified disaster coordinators. The VFDA response teams will provide support in recovery, evacuation, and identification of the remains.

The OCME is by law responsible for the deceased. Virginia is divided into four medical examiner districts that include the Northern Virginia District based in Fairfax, the Western District based in Roanoke, the Central District based in Richmond, and the Tidewater District based in Norfolk (See Attachment 1).

Emergency Support Function #9 - Urban Search and Rescue

Primary Agency
Campus Police
Radford University EMS (non transport)
Radford City Fire Department

Secondary/Support Agencies
Radford City Police Department
Radford University Office of Emergency Preparedness
Carillion Patient Transport Service
Volunteer Search and Rescue Groups
Virginia Department of Emergency Management

Introduction

Purpose:
Emergency Support Function (ESF) #9 – Urban Search and Rescue provides for the coordination and effective use of available resources for urban search and rescue activities to assist people in potential or actual distress.

Scope:
Radford University is susceptible to many different natural and technical hazards that may result in the damage or collapse of structures within the campus. Search and Rescue must be prepared to respond to emergency event and provide special life saving assistance. Their operational actives include locating, extricating, and providing on site medical treatment to victims trapped in collapsed structures. In addition to this, people may be lost, missing, disoriented, traumatized, or injured in which case the search and rescue agency must be prepared to respond to these incidents and implement search and rescue tactics to assist those who are, or believed to be, in distress or imminent danger. Predominately, these search operations occur in “open field” situation, such as parks, neighborhoods, or other open terrain.

Policies:
- The EOP provides the guidance for managing the acquisition of Search and Rescue resources;
- All requests for Search and Rescue will be submitted to the Radford University EOC for coordination, validation, and/or action in accordance with this ESF;
- Communications will be established and maintained with ESF #5 – Emergency Management to report and receive assessments and status information;
• Will coordinate with locality, state, and federal agencies when necessary;
• Personnel will stay up to date with procedures through training and education; and
• Search and rescue task forces are considered Federal assets under the Robert T. Stafford Act only when requested for a search and rescue for a collapsed structure.

Concept of Operations

General:

During a search and rescue operation after an emergency, the University will call upon the local fire and law enforcement departments to assist in the operation. The Emergency Medical Services (EMS) providers will also assist with other functions to search and rescue as set forth in the Virginia Association of Volunteer Rescue Squad's Operation Plan.

Organization:

The Fire Department will be the primary agency in any urban search and rescue operation. The local EMS, law enforcement, and facilities management will assist when required for structural evaluation of buildings and structures (ESF #3). Local Law Enforcement will be the primary agency in any ground searches. The local chapter of the American Red Cross will assist with support efforts during searches such as mass care feeding; sheltering; bulk distribution; logistics; and health and mental health services for rescue workers, support personnel, and the victims. The Health Department will advise search and rescue medical teams on industrial hygiene issues as they become apparent. Facilities Management will assist with any equipment, maps, staff, and vehicles. In a secondary role local law enforcement will assist with perimeter security, communications, and assistance as required. The Fire Department and EMS as a secondary role will provide medical resources, equipment and expertise.

Communications will be established and maintained with ESF #5 – Emergency Management to report and receive assessments and status information.

Actions

• Develop and maintain plans and procedures to implement search and rescue operations in time of emergency;
• Provide emergency medical treatment and pre-hospital care to the injured;
• Assist with the warning, evacuation and relocation of citizens during a disaster;
• The designated representatives should report to the Emergency Operations Center (EOC). When necessary assign duties to all personnel;

ESF #9-2
• Follow established procedures in responding to urban search and rescue incidents; and
• Record disaster related expenses.

Responsibilities

• Manages search and rescue task force deployment to, employment in, and redeployment from the affected area;
• Coordinates logistical support for search and rescue during field operations;
• Develops policies and procedures for effective use and coordination of search and rescue;
• Provides status reports on search and rescue operations throughout the affected area; and
• Request further assistance from the local jurisdiction and Virginia Department of Emergency Management for additional resources.
Emergency Support Function #10 - Oil and Hazardous Materials

Primary Agency
Radford City Fire Department
Safety Office

Secondary/Support Agencies
Virginia Department of Emergency Management
Virginia Department of Environmental Quality
Health Department
Law Enforcement
EMS
Office of Emergency Preparedness

Introduction

Purpose:
This section provides information for response to hazardous materials incident and assists the Local Emergency Planning Committee (LEPC) in meeting its requirements under the Emergency Planning and Community Right to Know Act – SARA Title III.

Scope:
The threat of an incident involving hazardous materials has escalated due to the increase in everyday use and transportation of chemicals by the various segments of our population. Hazardous Materials incidents can occur without warning and require immediate response to mitigate the effects of the release and protect the public.

Hazardous materials may be released into the environment from a variety of sources including, but not limited to:

- Fixed facilities that produce, generate, use, store or dispose of hazardous materials;
- Transportation accidents, including rail, aircraft, and waterways; and
- Abandoned hazardous waste sites; and
- Terrorism incidents involving Weapons of Mass Destruction.

Evacuation or sheltering in place may be required to protect portions of the university. If contamination occurs, victims may require special medical treatment requiring outside assistance from local and state resources.

The release of hazardous materials may have short and/or long health, environmental and economic effects depending upon the type of product.
Policies:

- Personnel who use, handle, or respond will be properly trained;
- Fixed Facilities will report annually under SARA Title III;
- Fire Chief or his/her designee will assume primary operational control of all hazardous materials incidents that are beyond the capabilities of University personnel;
- Determine the need to evacuate or shelter in place;
- Mutual aid agreements will be implemented; and
- Establish communications with ESF # 5 and ESF #15.

Concept of Operations

General:

The EOP and the Hazardous Materials Response Plan provide the guidance for managing hazardous materials incidents. All requests for hazardous materials support will be submitted to the EOC for coordination, validation, and/or action in accordance with this ESF.

Organization:

The Superfund Amendments and Reauthorization Act of 1986 (SARA Title III) requires the development of detailed procedures for identifying facilities with extremely hazardous materials and for assuring an adequate emergency response capability by these facilities and by local emergency services. A separately published Hazardous Material Emergency Response Annex has been developed for the university. This plan is considered to be a part of the University’s Emergency Operations Plan (EOP).

The Fire Chief or designee will assume primary operational control of all hazardous materials incidents that are beyond the ability of University Staff to contain.

Mutual aid agreements will be implemented should the incident demand greater resources than are immediately available. The Virginia Department of Emergency Management’s (VDEM) Regional Hazardous Materials Officer and Hazardous Materials Response Team may be requested through the Virginia Emergency Operations Center.

The Coordinator of Emergency Preparedness, in conjunction with the Fire Chief and VDEM Regional Hazardous Materials Officer, will determine the need to evacuate a large area. Evacuation orders or other protective actions will be issued as needed. However, the on-scene commander may order an immediate evacuation prior to requesting or obtaining approval, if this action is necessary to protect life and property. Residential Life, Fire, EMS, and Law Enforcement will coordinate the evacuation of the area. Law Enforcement is responsible for providing security for the evacuated area.

Should an evacuation become necessary, warning and directions for evacuation and/or protect in place will be disseminated via all appropriate means. Responding agencies will use mobile loudspeakers, Radford University Siren System, Mass Notification System, bull horns, and/or go door-to-door to ensure that residents in the threatened areas have received evacuation warning.
Actions

- Respond to the incident;
- Assess the situation;
- Determine the need for immediate evacuation or sheltering in place;
- Coordinate with the EOC;
- Request assistance through the VEOC; and
- Implement Mutual Aid agreements.

Responsibilities

- Develop and maintain the Hazardous Materials Emergency Response Annex;
- Develop procedures aimed at minimizing the impact of an unplanned release of a hazardous material to protect life and property;
- Conduct training for personnel in hazardous materials response and mitigation;
- Follow established procedures in responding to hazardous materials incidents;
- Provide technical information;
- Coordinate control/mitigation efforts with other local, state, and federal agencies; and
- Record expenses

SAFETY Department will maintain and update the SPCC & ODC Plan for the University
Primary Agency
Office of Emergency Preparedness
Facilities Management

Secondary/Support Agencies
Virginia Department of Emergency Management
State Corporation Commission
City of Radford
Department of Mines, Minerals, and Energy
Appalachian Electric Power Company
Atmos Energy

Introduction
Purpose:
Describe procedures to restore the public utility systems critical to saving lives, protecting health, safety, and property, and to enable ESFs to respond.

Scope:
ESF #12 will collect, evaluate, and share information on energy system damage. It will also estimate the impact of energy system outages within the affected area. According to the National Response Plan the term “energy” includes producing, refining, transporting, generating, transmitting, conserving, building, distributing, and maintaining energy systems. Additionally ESF #12 will provide information concerning the energy restoration process such as projected schedules, percent completion of restoration, and other information as appropriate.

Policies:
- Will work to provide fuel, power, and other essential resources to the university;
- Will work with utility providers to set priorities for allocating commodities;
- Personnel will stay up to date with procedures through education and training;
- Restoration of normal operations at critical facilities will be a priority; and

Concept Of Operations
General:
The supply of electric power to customers may be cut off due to either generation capacity shortages and/or transmission/distribution limitations. Generation capacity shortfalls are more likely to result from extreme hot weather conditions or disruptions to
generation facilities. Other energy shortages, such as interruptions in the supply of natural gas or other petroleum products for transportation and industrial uses, may result from extreme weather, strikes, international embargoes, disruption of pipeline systems, or terrorism.

The suddenness and devastation of a catastrophic disaster or other significant event can sever key energy lifelines, constraining supply in impacted areas, or in areas with supply links to impacted areas, and can also affect transportation, communications, and other lifelines needed for public health and safety. There may be widespread and prolonged electric power failures. Without electric power, communications will be interrupted, traffic signals will not operate, and surface movement will become grid locked. Such outages may impact public health and safety services, and the movement of petroleum products for transportation and emergency power generation. Thus, a major, prolonged energy systems failure could be very costly and disruptive.

**Organization:**

In the wake of such a major disaster, Local Emergency Operations Centers (EOC) will be assisted by state-level assets to help in the emergency efforts to provide fuel and power and other essential resources as needed. The priorities for allocation of these assets will be to:

- Provide for the health and safety of individuals and families affected by the event;
- Provide sufficient fuel supplies to local agencies, emergency response organizations, and service stations in critical areas;
- Help energy suppliers obtain information, equipment, specialized labor, fuel, and transportation to repair or restore energy systems;
- Recommend / comply with local and state actions to conserve fuel, if needed;
- Coordinate with local, state, and federal agencies in providing energy emergency information, education, and conservation guidance to the public;
- Coordinate information with local, state, and federal officials and energy suppliers about available energy supply recovery assistance;
- The Emergency Operations Center (EOC) will send requests to the State EOC for fuel and power assistance.

Additional supporting information, such as key contacts, recommended conservation measures, and pre-scripted press releases, can be found in the "Electric Power and Natural Gas Energy Emergency Handbook," maintained by the State Corporation Commission (SCC), and in the “Petroleum and Solid Fuels Energy Emergency Handbook,” maintained by the Department of Mines, Minerals, and Energy (DMME).

The State Corporation Commission (SCC) is the designated commodity manager for natural gas and electric power. The Virginia Department of Mines, Minerals and Energy (DMME) is the commodity manager for petroleum products and for solid fuels.

Following a catastrophic disaster, the Virginia Emergency Operations Center (VEOC), with staff support from SCC and DMME, will coordinate the provision of emergency
power and fuel to affected jurisdictions to support immediate response operations. They will work closely with federal energy officials (ESF 12), other Commonwealth support agencies, and energy suppliers and distributors. The university will identify the providers for each of their energy resources.

Actions

- Identify, quantify, and prioritize the minimum essential supply of fuel and resources required to ensure continued operation of university facilities
- Monitor the status of all essential resources to anticipate shortages;
- Maintain liaison with fuel distributors and local utility representatives;
- Implement local conservation measures;
- Keep the university community informed;
- Implement procedures for determining need and for the distribution of aid;
- Allocate available resources to assure maintenance of essential services;
- Consider declaring a local emergency; and
- Document expenses.

Responsibilities

- Review plans and procedures. Review procedures for providing lodging and care for displaced persons (see ESF #6);
- In the event of a fuel shortage, establish procedures for local fuel suppliers/distributors to serve customers referred to them by local government;
- Keep the university informed and aware of the extent of the shortage, the need to conserve the resource in short supply, and the location and availability of emergency assistance;
- Provide emergency assistance to individuals as required;
- Enforce state and local government conservation programs; and
- Identifies resources needed to restore energy systems.
Introduction

Purpose:

Emergency Support Function (ESF) #13 – Public Safety and Security is to maintain law and order, to provide public warning, to provide for the security of critical facilities and supplies, to provide a "safe scene" for the duration of a traffic disruptive incident, to effect the evacuation of threatened areas, to provide access control to evacuated areas or critical facilities, to assist with search and rescue operations, and to assist with identification of the dead.

Scope:

ESF #13 is designed to respond during a time of emergency using existing procedures. These procedures are in the form of department directives that cover all types of natural disasters, technological hazards, and acts of terrorism; incidents include flooding, hazardous materials spills, transportation accidents, search and rescue operations, traffic control, and evacuations.

In the event of a state or federally declared disaster, the Governor can provide National Guard personnel and equipment to support local law enforcement operations.

Policies:

- Radford University Police will retain operational control;
- The Incident Commander will determine the need for security at the scene;
- University Police in coordination with the Coordinator of Emergency Preparedness will identify areas of potential evacuation;
- The concentration of large numbers of people in shelters during an evacuation may necessitate law enforcement presence to maintain orderly conduct; and
Law enforcement will be needed in evacuated areas to prevent looting and protect property;

**Concept of Operations**

**General:**

Existing procedures in the form of department directives provide the basis for a law enforcement response in time of emergency. The mission of the Public Safety and Security function is to maintain law and order, protect life and property, provide traffic control and law enforcement support, guard essential facilities/supplies and coordinate mutual aid.

The Communications Center is the point of contact for the receipt of all warnings and notification of actual or impending emergencies or disasters.

If the National Guard is called in for a state or federally declared disaster they may only be used for low-risk duties such as security and traffic control. A hazard or potential hazard situation could justify the need for evacuation for a short period of a few hours to several days or weeks, depending on the hazard and its severity. In order to limit access to the hazard area, various personnel and devices will be required, such as the following:

- Personnel to direct traffic and staff control points;
- Signs to control or restrict traffic;
- Two-way radios to communicate to personnel within and outside the secured area;
- Control point(s);
- Adjacent highway markers indicating closure of area;
- Markers on surface roads leading into the secured areas;
- Patrols within and outside the secured areas; and
- Established pass system for entry and exit of secured areas.

The Virginia Department of Transportation Residency Shop and Private Contractors have general responsibility for signing and marking.

**Organization**

Radford University Police will utilize their normal communications networks during disasters. The Emergency Coordinator, in coordination with local law enforcement and the fire departments, should delineate areas that may need to be evacuated. Law Enforcement will set up control points and roadblocks to expedite traffic to reception centers or shelters and prevent reentry of evacuated areas. They will also provide traffic control and security at damaged public property, shelter facilities and donations/distribution centers. Should an evacuation become necessary, warning and evacuation instructions will be put out via radio and television. Also local law enforcement and fire departments will use mobile loudspeakers to ensure that all residents in the threatened areas have received the evacuation warning.
Actions

- Identify essential facilities and develop procedures to provide for their security and continued operation in the time of an emergency;
- Maintain police intelligence capability to alert government agencies and the university to potential threats;
- Maintain a Special Weapons and Tactics Team. (SWAT)
- Develop procedures and provide training for the search and rescue of missing persons;
- Develop strategies to effectively address special emergency situations that may require distinct law enforcement procedures, such as civil disorders, hostage taking, weapons of mass destruction, terrorist situations, and bomb threats/detonations;
- Test primary communications systems and arrange for alternate systems, if necessary;
- Assist with the implementation of the evacuation procedures for the threatened areas, if necessary;
- Provide traffic and crowd control as required;
- Implement existing mutual aid agreements with other jurisdictions, if necessary; and
- Document expenses.

Responsibilities

- Law enforcement;
- Crowd control;
- Conducts evaluation of operational readiness;
- Resolves conflicting demands for public safety and security resources;
- Coordinates backup support from other areas;
- Initial warning and alerting;
- Security of emergency site, evacuated areas, shelter areas, vital facilities and supplies;
- Traffic control;
- Evacuation and access control of threatened areas; and
- Assist the Medical Examiner with identification of the dead.
ENTRY PERMIT TO ENTER RESTRICTED AREAS

1. Reason for entry (if scientific research, specify objectives, location, length of time needed for study, methodology, qualifications, sponsoring party, NSF grant number and date on separate page). If contractor/agent--include name of contractual resident party, attach evidence of right of interest in destination. Resident: Purpose.

2. Name, address, and telephone of applicant, organization, university, sponsor, or media group. Also contact person if questions should arise.

3. Travel (fill out applicable sections; if variable call information to dispatcher for each entry)

   Method of Travel (vehicle, aircraft)

   Description of Vehicle/Aircraft Registration

   Route of Travel if by Vehicle

   Destination by legal location or landmark/E911 address

   Alternate escape route if different from above

4. Type of 2-way radio system to be used and your base station telephone number we can contact in emergency (a CB radio or radio telephone will not be accepted). Resident: cellular or home number.

   Entry granted into hazard area.

   Authorizing Signature _________________________________ Date _____________

   The conditions for entry are attached to and made a part of this permit. Any violation of the attached conditions for entry can result in revocation of this permit.
The Waiver of Liability is made a part of and attached to this permit. All persons entering the closed area under this permit must sign the Waiver of Liability before entry.
Tab 2 to Emergency Support Function #13

WAIVER OF LIABILITY
(TO BE SIGNED AND RETURNED WITH APPLICATION FORM)

I, the undersigned, hereby understand and agree to the requirements stated in the application form and in the safety regulations and do further understand that I am entering a (high) hazard area with full knowledge that I do so at my own risk and I do hereby release and discharge the federal government, the Commonwealth of Virginia and all its political subdivisions, their officers, agents and employees from all liability for any damages or losses incurred while within the Closed Area.

I understand that the entry permit is conditioned upon this waiver. I understand that no public agency shall have any duty to attempt any search and rescue efforts on my behalf while I am in the Closed or Restricted Area.

Signature of applicant and members of his field party

Print full name first, then sign.

I have read and understand the above waiver of liability.
Emergency Support Function #14 –
Long Term Community Recovery and Mitigation

Primary Agency

FEMA
Board of Visitors
Radford University Cabinet

Secondary/Support Agencies

Radford University Office of Emergency Preparedness
Virginia Department of Housing and Community Development
Virginia Department of Health
American Red Cross
Virginia Voluntary Organizations Active in Disaster (VVOAD)
Southwest Medical Reserve Corp
Virginia Department of Emergency Management

Introduction

Purpose:

Emergency Support Function (ESF) #14 – Long Term Community Recovery and Mitigation develops a comprehensive and coordinated recovery process that will bring about the prompt and orderly restoration of community facilities and services, infrastructure, and economic base, while providing for the health, welfare and safety of the population.

Scope:

ESF #14 support may vary depending on the magnitude and type of incident and the potential for long term and severe consequences. ESF #14 will address significant long-term impacts in the affected area on housing, business and employment, community infrastructure, and social services.

Policies:

- Long term university recovery and mitigation efforts are forward looking and market based, focusing on permanent restoration of infrastructure, housing and the local economy, with attention to mitigation of future impacts of a similar nature when feasible;
- Use the post-incident environment as an opportunity to measure the effectiveness of previous recovery and mitigation efforts;
- Facilitates the application of loss reduction building science expertise to the rebuilding of critical infrastructure; and
- Personnel will stay up to date with policies and procedures in the COOP Plan through training and education.
Concept of Operations

General:

The recovery phase is characterized by two components: the emergency response phase which deals primarily with life saving and emergency relief efforts (i.e., emergency food, medical, shelter, and security services); and the broader recovery and reconstruction component which deals with more permanent and long-term redevelopment issues.

Although all university departments are involved in both components, the emphasis and focus changes among departments as they shift from one component to the other. In the emergency response and relief recovery component, the primary local departments involved include fire and rescue, law enforcement, health, social services, education, and public works departments; whereas in the recovery and reconstruction component, the emphasis shifts to university departments dealing with housing and redevelopment, public works, economic development, land use, zoning, and government financing. The two components will be occurring simultaneously with the emergency relief component taking precedence in the initial stages of recovery, and the recovery and reconstruction component receiving greater attention as the recovery process matures.

The Office of Emergency Preparedness will be the lead coordinating department in the life-saving and emergency relief component of the recovery process and the Director of Planning and Construction will take the coordinating lead during the reconstruction phase.

The recovery analysis process is comprised of the following phases: reentry, needs assessment, damage assessment, the formulation of short- and long-term priorities within the context of basic needs and available resources, and the identification and implementation of appropriate restoration and development strategies to fulfill priorities established, as well as bring about an effective recovery program.

The damage assessment process for the university is described in the Continuity of Operations (COOP) Annex of the EOP. Team leaders for the Damage Assessment Teams have been identified and the necessary forms included within this support annex. Although damage assessment is primarily a local government responsibility, assistance is provided by state and federal agencies, as well as private industry that have expertise in specific functional areas such as transportation, agriculture, forestry, water quality, housing, etc.

The process to request and receive federal assistance will be the same as all other natural or man-made disasters. The Virginia Department of Emergency Management will be the coordinating state agency in the recovery process, and FEMA will be the coordinating federal agency. Utilizing the preliminary damage assessment information collected, short-term and long-term priorities are established and recovery strategies developed in coordination with other state agencies, local governments, the federal government, and private industry.
Short-term recovery strategies would include:

- Emergency Services;
- Communications and IT networks;
- Transportation networks and services;
- Potable water systems;
- Sewer systems;
- Oil and natural gas networks;
- Electrical power systems;
- Initial damage assessment;
- Emergency debris removal;
- Security of evacuated or destroyed area; and
- Establishing a disaster recovery center and joint field office

Long-term strategies would strive to restore and reconstruct the post-disaster environment to pre-existing conditions. Federal and state agencies will provide technical assistance to localities in the long-term planning and redevelopment process. Economic aid will be provided to assist localities and states in rebuilding their economic base, replacing and restoring their housing inventory, and ensuring that all construction and development complies with building codes and plans. Regional cooperation and coordination will be stressed and promoted at all levels of government in order to achieve the priorities established and facilitate recovery efforts. The locality will develop strategies in coordination with regional local governments and New River Planning District Commission. Federal and state catastrophic disaster plans will support this effort. Items or actions to be focused on in this phase include:

- Completion of the damage assessment;
- Completion of the debris removal;
- Repairing/rebuilding the transportation system;
- Repairing/rebuilding of private homes and businesses; and
- Hazard Mitigation projects.

**Organization:**

The Director of Emergency Management will direct response, recovery, and reconstruction efforts in the disaster impacted areas of the university, in coordination with the Coordinator of Emergency Management, all local departments, and the appropriate state and federal agencies.

A Presidential Declaration of Disaster will initiate the following series of events:

- Federal Coordinating Officer will be appointed by the President to coordinate the federal efforts;
- State Coordinating Officer will be appointed by the Governor to coordinate state efforts;
- A Joint Field Office (JFO) will be established within the state (central to the damaged area) from which the disaster assistance programs will be coordinated; and
• A Disaster Recovery Center (DRC) will be established in the affected areas to accommodate persons needing individual assistance after they have registered with FEMA.

A Presidential Declaration of Disaster may authorize two basic types of disaster relief assistance:
  • **Individual Assistance** – Supplementary Federal Assistance provided under the Stafford Act to individuals and families adversely affected by a major disaster or emergency. Such assistance may be provided directly by the Federal government or through State or local governments or disaster relief organizations.
  • **Public Assistance** – Supplementary Federal Assistance provided under the Stafford Act to State and Local governments or certain private, non-profit organizations other than assistance for the direct benefit of families and individuals.

As potential applicants for Public Assistance, Radford University must thoroughly document disaster-related expenses from the onset of an incident.

Mitigation has become increasingly important to local officials who must bear the agony of loss of life and property when disaster strikes. The Director of Emergency Management will take the lead in determining mitigation projects needed following a disaster and make applications for available mitigation grants.

**Actions**

- In cooperation with other ESFs, as appropriate, use hazard predictive modeling and the university COOP Plan to ascertain vulnerable critical facilities as a basis for identifying recovery priorities;
- Gather information to assess the scope and magnitude of the social and economic impacts on the campus;
- Coordinate and conduct recovery operations;
- Conduct initial damage assessment;
- Coordinate early resolution of issues and delivery of assistance to minimize delays for recipients;
- Coordinate assessment of accuracy and recalibration of existing hazard, risk, and evacuation modeling;
- Facilitate sharing of information and identification of issues among agencies and ESFs;
- Facilitate recovery decision making across ESFs;
- Facilitate awareness of post incident digital mapping and pre-incident hazard mitigation and recovery planning;

**Responsibilities**

- Develop plans for post-incident assessment that can be scaled to incidents of varying types and magnitudes;
• Establish procedures for pre-incident planning and risk assessment with post
  incident recovery and mitigation efforts;
• Develop action plans identifying appropriate agency participation and resources
  available that take into account the differing technical needs for risk assessment
  and statutory responsibilities by hazards;
• Ensure participation from primary and support agencies;
• Lead planning;
• Lead post-incident assistance efforts; and
• Identify areas of collaboration with support agencies and facilitate interagency
  integration.

Emergency Support Function #15 - External Affairs

Primary Agency
Vice President of University Relations
President and Cabinet

Secondary/Support Agencies
Office of Emergency Preparedness
City of Radford Fire Department
Radford University Police Department
Information Technology Departments
Student Health Services
Health Department
Department of Social Services
Virginia Department of Emergency Management
Local Print and Media Outlets
Joint Information Center (JIC)

Introduction

Purpose:
Emergency Support Function (ESF) #15 – External Affairs is responsible for keeping the public informed concerning the threatened or actual emergency situation and to provide protective action guidance as appropriate to save lives and protect property. University Relations will be responsible for all communications after the initial crisis message(s) from the police or Office of Emergency Preparedness. The Radford University Police or Office of Emergency Preparedness may send additional critical messages in order to protect the campus community. These messages will be sent to University Relations so that following releases can be communicated to the public with a consistent theme.

Scope:
To manage information during an incident so that the most up to date and correct information is used to inform the public. This emergency support function will use media reports to support the overall strategy for managing the incident. This function will coordinate with all agencies involved with the incident so that one message is used for public information to avoid any conflicts of released information. This may require the formation of a Joint Information Center. The location of this center will be determined by the emergency type and location. This emergency support function is organized into the following functional components:

- Public Affairs
- Community Relations
- Legislative Affairs
- International Affairs
Policies:

During an emergency the Public Information Officer will:

- Disseminate information by appropriate means, to include any university and local alert systems, media outlets, cable channel, the Emergency Alert System, NOAA All-hazards radio, and the locality’s website;
- Clear news releases with the EOC before releasing them to the media;
- Encourage news media to publish articles to increase public awareness; and
- Ensure information is accurate and released in a timely manner.

Concept of Operations

General:

In an emergency or disaster it is important to provide timely and accurate information to the public and to the media outlets. News coverage must be monitored to ensure that accurate information is being disseminated. The locality needs to be prepared to keep local legislators and other political figures informed.

Organization:

Public Affairs is responsible for coordinating messages from the various agencies and establishing a Joint Information Center. University Relations will gather information on the incident and provide incident related information through the media and other sources to keep the public informed. Public Affairs will monitor the news coverage to ensure the accuracy of the information being disseminated. Public Affairs will handle appropriate special projects such as news conferences and press operations for incident area tours. The Public Affairs Support Annex provides additional details on responsibilities.

Community Relations will prepare an initial action plan with incident-specific guidance and objectives, at the beginning of an actual or potential incident. They will identify and coordinate with the community leaders and neighborhood groups to assist in the rapid dissemination of information, identify unmet needs, and establish an ongoing dialogue and information exchange. The Commonwealth and FEMA deploy a joint Community Relations Team to the locality to conduct these operations.

Legislative Affairs will establish contact with the state legislative and congressional offices representing the affected areas to provide information on the incident. The locality should be prepared to arrange an incident site visit for legislators and their staffs. Legislative Affairs will also respond to legislative and congressional inquiries.

International Affairs, if needed, will work with the Department of State to coordinate all matters requiring international involvement.
Actions

- Evaluate the situation;
- Monitor national and state level news coverage of the situation (if applicable);
- After coordination with the University EOC, time permitting, the PIO will begin to disseminate emergency public information via news releases to the local news media;
- The content should be coordinated with adjacent jurisdictions and the City EOC;
- Emphasize citizen response and protective action;
- Develop accurate and complete information regarding incident cause, size, current situation, and resources committed;
- Continue to keep the public informed concerning local recovery operations;
- Assist the Health Department in disseminating public health notices, if necessary;
- Assist state and federal officials in disseminating information concerning relief assistance; and
- Document expenses.

Responsibilities

- Establish a working arrangement between the City PIO, the local EOC and local radio stations, television stations, and newspapers;
- Encourage local newspapers to periodically publish general information about those specific hazards, which are most likely to occur, such as flooding and industrial accidents;
- Prepare and provide general information as appropriate to special groups such as the visually impaired, the elderly, etc.;
- If necessary, designate a phone number and personnel to handle citizen inquiries;
- Assure the availability of back-up generators at local EAS radio stations;
- Arrange regular press briefings;
- Coordinate the release of information through public broadcast channels, and written documents; and
- Maintain an up-to-date telephone and fax number list for all local news organizations.
